Inspired by successful television program, "Who Do You Think You Are?" and the popularity of such online genealogical resources as Ancestry.com and Family Search, millions of people are taking advantage of billions of digitized public records and publications (census enumerations, city directories, newspapers, military records, etc.) to become online historical detectives. Some are also becoming 21st century family "kinkeepers": combining digital resources with local archival resources (including the Southern Historical Collection and North Carolina Collection at UNC and State Archives in Raleigh), family memorabilia from "the bottom drawer of grandma's dresser" and recordings of family stories to create multimedia family archives, which can be shared with far-flung extended family members and passed down to future generations. This course unfolds the process and materials of genealogical research to larger historical issues and contexts; explores how family history can personalize and localize social, cultural, political, and economic history; and asks how the question "Who do you think you are?" can become the basis for examining "Who do we think we are?" as a diverse national culture. Participants will research and document the history of (at least!) the last four generations of their biological/cultural families; gather (and preserve) family history materials from living family members; and explore the complexities of family history in relation to gender, race, and ethnicity. In addition to learning more about your Honors Carolina students register online when their registration appointment begins. Other students register online beginning November 17.

Prerequisites: *First-year students only. The Spring 2015 offering is supported by the Johnston Scholars Program. Contact Holley_Nichols@unc.edu or Rachel.Willis@unc.edu for more information and priority registration no later than noon on Friday, Nov. 14. ABOUT THE SEMINAR: This first year seminar is designed to better prepare students for future international travel, research, service, and work opportunities while understanding the implications of national identity and action in a global environment. Using group projects, collaborative field study, and individual proposal writing, we will explore a wide range of issues. Differences in geography, politics, religion, culture, gender roles, and more will be considered as students intensely develop individual plans for foreign travel, study, and work using readings, class exercises, documentary video and photography, and interviews. There will be a special focus on transportation systems and other forms of infrastructure that impact navigating places, people, and information. In addition, the class will have specialized access to professional resources to help identify funding sources for travel. Students will be individually guided through the fellowship application process of researching international travel opportunities and writing a competitive travel proposal and budget. ABOUT THE INSTRUCTOR: Dr. Rachel Willis is a Senior Fellow at the Global Research Institute and Associate Professor of American Studies and Economics at UNC. She

This course provides an overview of the interdisciplinary methods of American Studies and contemporary approaches to the study of American society and culture, with an emphasis on literary works. In addition to a variety of short stories and essays that cover the span of the twentieth century, our examination of American life will center on four historical moments. First, we will explore representations of race, gender, and citizenship in the late nineteenth century, with a focus on depictions of the Spanish-American War and the U.S. occupation of the Philippines, as well as more recent reflections on Filipino identity in fiction and film. We will also study the U.S. presence in Haiti and explore representations of marriage and consensual governance in Hollywood zombie movies, including White Zombie. (Dir. Victor Halperin, 1932) and I Walked with a Zombie (Dir. Jacques Tourneur, 1943). Next, we will examine Jack Kerouac's The Subterraneans (1958) and the cultural impact of the Beat Generation, as well as the commodification of "beatnik" culture and Beat philosophy in Hollywood films such as Funny Face (dir. Stanley Donen, 1957). Finally, we will examine representations of the AIDS epidemic and the origins of ACT Up, as well as other manifestations of gay and lesbian political activism in the 1980s and 90s. Athletes and other human beings welcome.

This course provides an introduction to the interdisciplinary methods of American Studies scholarship with an emphasis on the importance of historical analysis. Together, driven by your discussion of course texts, we will seek to understand historic and contemporary conflicts over American identity and how history is used and misused today. Since we are here in the South, we will focus in particular on this region, though without ignoring the rest of the country. This course is divided into four units. The first will introduce you to some of the essential concepts in play in American Studies and liberal arts scholarship. Then we will consider four broad subjects: southern identity, gender and sexuality, American national identity, and the role of natural and constructed spaces in shaping American history and culture. Each unit will move from the post-Civil War period to the modern day.

This class serves as an introduction to American Indian Studies. It begins with an exploration of the field's origins and evolution. Then, throughout the semester, we will learn about the approaches adopted by archaeologists, historians, anthropologists, literary scholars, and specialists in law. You will gain a critical introduction to the questions asked by individuals working in these fields and to the "raw materials" of their various "ways of knowing," including ethnographic interviews, oral histories, archival materials, artifacts, maps, language, place, forms of expressive culture, and material objects. Still more exciting, you will be learning directly from the outstanding American Indian Studies faculty at the University of North Carolina.								

AMST	211	001	5897	SOUTHERN STUDIES LITCULT	Lecture (Face to Face Instruction)	3		A
In the past, to discuss the South, we would first define the borders of the region, and theorize about what makes the South distinctive. The "old" map of the South traditionally referred to the eleven states of the former Confederacy, but today, these rigid borders are more fluid. The South "is found wherever southern culture is found," existing "as a state of mind both within and beyond its geographical boundaries." Beyond the question of what constitutes the South's borders, a new vision of Southern Studies challenges conventional tropes of southern identity. The "new Southern Studies" considers landmarks of southern identity other than the Civil War, Reconstruction, and barbecue. Rather than the old white and black South, the "new Southern Studies" recognizes the diverse cultures and ethnicities of the South, whose global influences have shaped the region in powerful ways for centuries. In this gateway course to the study of the American South, students will examine southern cultural identity, recognizing the contributions of all its people, including men and women of American Indian, African, Latino, Asian, and European descent. Students will consider the region in all its complexity through a multi-disciplinary conversation about the American South that considers art, archaeology, architecture, cultural tourism, ecology, folklife, foodways, geography, history, language, literature, material culture, myth and manners, music, politics, religion, values, and more. Throughout the semester,

This interdisciplinary seminar course examines a broad range of artistic expression among the Indigenous people of the Americas, Canada, and the Pacific. Using specific case studies, we will consider how chosen performance strategies address many current political, cultural, and historical issues relating to understandings of indigeneity today. Our investigations will emphasize the centrality of performance both historically and in the modern world as a means of preserving and asserting Native cultural values in the present-day. Topics will include: performance and traditions in a Postmodern era, defining indigeneity through performing bodies, representations of the indigenous in drama, and Native stereotypes in film. In addition to reading contemporary theory and criticism and performance ethnographies, students will watch films and performances.

This class will afford students the opportunity to learn and engage with how legal education is conducted in the United States by mimicking the "1L" experience, or first year in law school. The class is broken into units that represent the classes that virtually every law school teaches to its first year class. By the end of the course, students will have an introductory understanding of some of the major principles in some of the most prominent areas of law, a greater capacity to "think like a lawyer," and a true sense of life as a law student and a member of the legal profession.

This course explores Native America during the "long 1960s," a period that extends from the mid-1950s to the mid-1970s. Our goal will be to arrive at a story that is at once distinctively indigenous and inextricably bound up with the larger narrative of United States history. To do so, we will compare and contrast Native and non-Native involvement in youth, women's rights, civil rights, radical protest, ethnic nationalist, and anticolonial movements, as well as the War on Poverty and Vietnam War.

AMST	340	001	9148	AM INDIAN ART & MAT CULTURE Lecture		3	A

Attributes: VP- Visual or Performing Arts, NA- North Atlantic World							

This course examines American Indian art and material culture through interdisciplinary perspectives. Throughout the course students will gain a greater understanding of the role that the arts play in the social, cultural, and political life of American Indian peoples. This course will also explore a number of questions: What is the relationship between art and American Indian identities? How have Native artists negotiated various markets and audiences for their works? Over the course of the term students will read, discuss, and write about a number of objects and texts. In addition to articles and book chapters we will read Native North American Art, by Janet C. Berlo and Ruth B. Phillips, History of the Book in Indian Country by Phillip, No Deal! Indigenous Art and the Politics of Possession, edited by Tressa Berman, Object of Exchange: Social and Material Transformation in the late Nineteenth Century Northwest Coast, and The Painted Drum by Louise Erdrich.

AMST	371	001	12521	LGTBQ FILM AND FICTION	Lecture (Face to Face Instruction)	3	A

							Special Grading: GR1
Attributes: VP- Visual or Performing Arts, US- U.S. Diversity							

This course will explore representations of gay, lesbian, transgender, bisexual and gender-queer identities in American literature and film from 1950 to the present, with a focus on close readings of literary and film texts to gain insight into stylistic choices and representational modes available to lgbtq artists. We will examine how theories about gender and sexual identity have shifted in the last half-century, and consider topics such as sexuality, desire, activism and family. We will also study the impact of specific historical developments on the emergence of a lgbtq literary tradition in the United States. Novels will include Trace Elements of Random Tea Parties (2004) by Felicia Lunas Lemus and City of Night (1963) by John Rechy. Additionally, we will read poems, short stories, essays, and excerpts from works by James Baldwin, Sarah Schulman, David Wojnarowicz, Gloria Anzaldúa, Chrystos, Cathy Cohen, Adam Haslett, and others. Films may include The Children's Hour (dir. William Wyler, 1961); Female Trouble (dir. John Waters, 1974); Mala Noche (dir. Gus Van Sant, 1986); The Watermelon Woman (dir. Cheryl Dunye, 1996); Southern Comfort (dir. Kate Davis, 2001); and Pariah (dir. Dee Rees, 2011). Athletes and other human beings welcome.

Note: AMST 375 is restricted to ensure the class serves students at all stages in their academic careers. If you attempt to register for AMST 375, and receive a message that you don't meet the requisites, this is because all seats for your class (FR, SO, JR or SR) have already been claimed. Course explores the history and contemporary politics of food in five regions of North Carolina: the coast, eastern Carolina, the Piedmont, western Carolina, and the state's borderlands. Organized around selected core foods in each region, themes include southern history and culture (food and race, class, gender, ethnicity, and place), environmentalism and sustainability, public health/nutrition, activism, immigration, globalism, gender and sexuality, and justice. An oral history project developed in collaboration with community members sends students into the field to document our state's relationship with cooking and eating as a lens onto national and global food issues. Farmers, chefs, activists, and statewide leaders of the food movement will join us in the classroom.

Memory has long been studied in the academy as a psychological process of individual cognition. Over the past quarter century, however, notions of collective, public, and cultural memory have emerged as a useful means of understanding the complex ways that personal remembrances are enmeshed in larger patterns that inform social belonging. This course examines the powerful and contested role of memory in constructing historical meaning and imagining the cultural boundaries of communities. We will examine a variety of symbolic and material expressions that Americans have developed over time to celebrate national, regional, and ethnic difference by exploring popular fictions, films, rituals, artifacts, monuments, landscapes, and performances. Problems we will examine include the invention of tradition; the politics of commemoration; subaltern expression and counter-memory; and the cultural work and play performed by celebrity figures, sites of memory, national legends, and literary canons. We will approach these problems from a variety of disciplinary perspectives including those of literature, history, anthropology, folklore, cultural geography, and media studies. Students enrolling in AMST 384 must also enroll in one recitation section numbered AMST 384-601 through AMST 384-604.

This seminar investigates the history of the arts as instruments of social change in America. A large portion of this class will be student engagement in arts-based service-learning project. The student experiences in the community will provide a direct experience of the power--and challenges--of art as a catalyst for social change here in North Carolina. Another avenue by which we will explore these topics will be through Carolina Performing Arts' Lamentation Project, which asks how we go about expressing grief and recovering from the experience of loss.

How do we construct research in southern studies today? What methods do we adopt, modify, and innovate to write about the experiences of living in the past, present, or future of the US South? How can recent scholarship help us organize and analyze our own research projects? Whether we study the imagined souths of media and culture, global US souths of social and economic capital, ecological souths of field and city, or queer-raced-gendered souths in liminal spaces, we as writers about and students of this place must make decisions about how to proceed. Reading and discussion in this seminar explore strategies for today's southern studies. Then, from diverse disciplinary and interdisciplinary locations, we will choose methods for our own scholarship as we apply what we have learned to data gathered by the parallel Carolina Eats course taking place on campus this semester. The final project in the class will model southern studies' methodologies to write about North Carolina, the state's foodways, and complementary projects developed by course participants. Please note: students are not required to register for the Carolina Eats course, but we will engage with it over the semester. Cross participation is welcome.									

AMST	466	001	9498	AMERICAN HOUSING	Lecture (Face to Face Instruction)	3		A	
Bldg: Murphey		Room: 0204		Days: TuTh	Time: 11:00 - 12:15		Rank: INST	Load: 100	Instructor: ROBERTS,KATHERINE R

Attributes: HS- Historical Analysis, CI- Communication Intensive, E4- Field Work									

This course is designed to attune students to the complexities of human shelter. We will begin our journey by studying the development of several national and regional housing types in the U.S. and the environmental and socio-political factors that contributed to their formation. From shotguns to ranches to mobile homes and more, we will learn about how domestic forms in the built environment have contributed to American cultural landscapes--past and present.

In addition, we will explore the social use and meaning of housing and examine the strategies people use to create "homes" out of built forms. Finally, we consider several larger issues associated with housing in the U.S., including affordability, sustainability and gentrification. By the end of the course, students should be able to understand the built environment as a form of communication, capable of revealing what we value as individuals and communities and as a nation, and to critically evaluate the ways in which housing mediates power relations in the U.S.

AMST 498: Global Impacts on American Waters Water is a vital element for life, agriculture production, countless processes essential to health and economic development, transportation, industrial processing, energy production and distribution. Nations have always been connected and separated by water through borders, trade, and transportation systems. This seminar will focus on examining the key global impacts on American waters with respect to the history of port cities and water corridors. Students will learn from readings, documentary sources, music and expert guests about critical global water transportation issues and related impacts. A major portion of the course will be devoted to climate change predictions of sea-level rise, increased storm severity, and drought. Equally important will be examining the potential for planning in creating opportunities for resilience, recovery, and development with respect to local, regional, national and global water issues. Everyone will participate in one of two related local research conferences in March (NEXUS on Water, Food, Climate and Energy or the Global American South Conference on ¿The State of the Plate). Throughout the term, students will be responsible for several short collaborative projects related to water and one major individual research project and presentation on a pair of selected port cities (one US and one abroad). This course is taught by Dr. Rachel A. Willis, Senior Fellow at the Global Research Institute and Associate Professor in

This course focuses on the application of interdisciplinary digital humanities approaches within site-based, community-oriented, public history projects. We'll explore how to incorporate a physical and emotional sense of place into digital spaces. We'll also consider how to use digital technologies to interpret historic sites in ways that engage broad publics and foster local community. Students will analyze/discuss readings on digital humanities and public history theory, review case studies, and critique examples of digital public projects. They also will analyze ongoing work in the Digital Innovation Lab (DIL), including the Loray Mill project. Students also will gain hands-on, practical experience in applying digital tools & methods to a public history project. They will contribute work to one or more DIL projects in ways that could be translated into individual portfolios. No prior DH training is necessary, but a willingness to experiment and make small contributions to a long-term, collaborative effort is essential.

This semester we will explore American Indian ethnohistory as an interdisciplinary methodology and read a selection of emblematic works. The course will be at once methodological, historiographical, and content-driven. We begin by asking a deceptively simple question: What is ethnohistory? Then we will read some of the most important and/or controversial texts, following a roughly chronological framework. Most of the readings will further offer an opportunity to investigate particular themes, from race and gender to labor and ecology. While we will delve deeply into American Indian history, this course has been designed to be accessible to those who do not have a background in the field. This course is cross-listed with HIST 878.

This course is intended to lead graduate students in American Studies, History, English, and other fields in an exploration of key texts and issues in the American popular arts through the nineteenth and twentieth centuries. Each week we will consider a central text, individual, or site and discuss its salient themes, historical and artistic contexts, and critical issues surrounding its reception and ongoing appraisal. These topics will include: P. T. Barnum and the art of humbug (especially his 1855 autobiography); Harriet Beecher Stowe's *Uncle Tom's Cabin*; Mark Twain's *Pudd'nhead Wilson*; Coney Island and the pleasures of the urban crowd; vaudeville theater and gender, racial, and ethnic spectacle; Louis Armstrong and the rise of jazz; Dashiell Hammett's *The Maltese Falcon* and the transformation of the detective story; Hollywood escapism in the Great Depression; *Porgy and Bess* and its musical and racial controversies; Disneyland and postwar America; Michael Kramer's *The Republic of Rock*, the counterculture, and the war in Vietnam; and love, hate, and longing in Robert Altman's *Nashville* and Spike Lee's *Do the Right Thing*. We will also attend a performance in Memorial Hall by the brilliant singer and actress Audra McDonald.

Folklorists seek to understand how people interpret and make sense of the world. In this course we will look at diverse forms (or "genres") of folklore, including song, architecture, legend, and food. We will consider how vernacular expressive culture is learned, what it does for people, and why these processes and products persist through time and space. Students will be introduced to the discipline of Folklore's central research methodology, ethnography, and have an opportunity to practice that approach in individual and group research projects. Students enrolling in 202-001 are also required to enroll in one recitation section numbered 202-601 through 202-604.

Open seats are reserved for Juniors, Sophomores, and Freshmen. Course explores the history and contemporary politics of food in five regions of North Carolina: the coast, eastern Carolina, the Piedmont, western Carolina, and the state's borderlands. Organized around selected core foods in each region, themes include southern history and culture (food and race, class, gender, ethnicity, and place), environmentalism and sustainability, public health/nutrition, activism, immigration, globalism, gender and sexuality, and justice. An oral history project developed in collaboration with community members sends students into the field to document our state's relationship with cooking and eating as a lens onto national and global food issues. Farmers, chefs, activists, and statewide leaders of the food movement will join us in the classroom.

Combined Section ID: 0351(anth484/folk484/ling484) - ANTH 484(#12005), LING 484(#13317)

Complex communication is a defining capacity of human beings and a crucial factor in the creation and maintenance of human societies. Effective communication requires not only a shared language, but also a shared set of social conventions about how to speak--who may talk to whom, what styles are appropriate for what occasions, what forms recognizably accomplish the various things speaking is supposed to get done, etc., which differ among social groups just as much as do languages themselves. Additionally, in the course of employing the discursive resources they inherit, speakers inevitably make their own contributions, transforming the patterns they transmit. The study of discourse consequently provides a window into the micro-level workings of social change and into the ways that individuals and groups negotiate and regenerate their identities through communication with present and anticipated interlocutors. The course revolves around two projects in which students record, edit, and analyze examples of spontaneous live speech and share conclusions with the class. Fulfills the Social and Behavioral Science, U.S. Diversity, and Communication Intensive requirements.

Class will meet at: Center for the Study of the American South University of North Carolina at Chapel Hill 410 East Franklin Street, CB # 9127 Chapel Hill, NC 27599-9127 Graduate students enrolling in this course will also meet 9:30-10:30 on Tuesdays. This course focuses on Southern writers and explores how they use oral traditions in their work. We will discuss the nature of oral tradition and how its study can provide a methodology for understanding Southern literature. We will consider how specific folklore genres such as folktales, sermons, and music are used by Southern writers, and we will discuss how such genres provide structure for literary forms such as the novel and the short story. The seminar begins by exploring the nature of folklore and how its study has been applied to both oral and written literature. We will then consider examples of oral history and how they capture the southern voice. We will discuss how nineteenth century slave narratives by Harriet Ann Jacobs and Frederick Douglass and works by Tennessee Williams and Mark Twain deal with local color and black and white southern voices. After these readings, we will consider a rich selection of twentieth century Southern writers and discuss how they use folklore in their work.

To many, the combination of the terms "art"--with its implications of creativity and aesthetic engagement--and "ethnography"--the practice of engaged community study, with the end of deeper cultural understanding--might seem a bit odd. But this layering speaks rather pointedly to the ways we'll approach ethnography in this graduate seminar, treating it as more than mere process and skill, and as more than just research and writing. Ethnography--as a process based in conversation and the search for shared understanding--is inherently creative. It's always a "making," an enacting that begins with conversations in the "field," moves into domains of intimate sharing and mutual realization, and eventually finds voice in various forms of artful representation. All these realms of enactment involve a host of choices that ethnographers and their consultants creatively make throughout the course of their engagement. In the field, these choices encompass such matters as with whom to speak; how to present oneself in that speaking; how and with whom to craft bonds of collaboration; how to offer oneself as student, friend, and colleague; how to enact an ethic of caring and equity; and how to measure one's emergent understanding. In crafting the representation, choices involve what to include and what to leave out; when to give voice to consultants and when to speak for self; how to frame and how to order and how to story. In these arenas of dialogue and subjective choice lies the art in ethnography. This

The goal of this FYS is to encourage students to adopt a long view of human societies and to examine responses to crises engendered by political, economic, and environmental factors over the longue durée. Perspectives on societal change;both apocalyptic and transformational;are critically examined in this seminar in light of a suite of case studies that reach back to Mesopotamia (3rd millennium B.C.), Classic Maya and U.S. Pueblo dwellers of the first millennium A.D. and also include contemporary situations such as the Rwandan genocide, nations such as Haiti that are alleged to be ;failed; states, and the current global crisis of environmental sustainability. Students gain familiarity with evaluating archaeological, historical, and environmental information that is pertinent to social change. The aim of the seminar is to foster critical thinking and the ability to evaluate narratives (in both scholarly and popular media) about societal crises and human resilience. Seminar research materials include books, journal articles, films, and student-run interviews. Class meetings generally consist of a short, introductory lecture followed by discussion headed by student discussion leaders who develop and circulate ;talking points; before each class meeting based upon reading material for that day;s seminar. Additionally, each student selects a topic or a case study to research in depth, develops a short class presentation (about 10 minutes), and writes a final research paper. FIRST YEAR STUDENTS ONLY. Patricia A. Honors Carolina students register online when their registration appointment begins. Other students register online beginning November 17.

Prerequisites: *First-year students only. Registration Procedures: *Students who are not enrolled in a fall 2014 FYS register online when their registration appointment begins. *Other students register online beginning Nov 17. ABOUT THE SEMINAR: Can we truly access, understand, and represent the lives of others? In this class, we will take on this question by taking up the practice of ethnography: a research method consisting of entering into a community, interacting with its members, observing social life, asking questions, and writing about our findings. Turning to anthropology and the growing number of disciplines using ethnography today, we will examine the ways ethnographers work to understand the people they work with. Over the semester, we will explore the method by becoming ethnographers ourselves. You, the student, will accordingly venture into the social world to conduct research on a topic and with a community of your choosing;thereby giving you first-hand knowledge of what it means to translate their worlds into your words. These are skills of social understanding that should serve students across their academic careers and beyond. ABOUT THE INSTRUCTOR: Townsend Middleton is a political anthropologist of India and South Asia. His work focuses on movements for `tribal; recognition and autonomy in the Himalayan region of Darjeeling, India. He teaches and writes on a variety of issues including: identity politics, the state, and post/colonialism in South Asia and beyond.

Prerequisites: *First-year students only. Registration Procedures: *Students who are not enrolled in a fall 2014 FYS register online when their registration appointment begins. *Other students register online beginning Nov 17. ABOUT THE SEMINAR: Who has the right to define what counts as art? Both the market and the academy readily claim this prerogative, offering themselves as artistic gatekeepers who hold the rights of definition. Meanwhile, countless folk artists with neither formal training nor affiliation follow their own visions, creating works grounded more in the everyday aesthetics of their communities; and in the wonders of their imaginations; than in the traditions of mainstream art. The market is quick to label these artists outsiders, crafting biographies that highlight their presumed eccentricity and oddness. This seminar will turn the tables on this act of imposed definition, exploring the worlds of self-taught artistry by engaging the artists directly, asking questions about meaning, tradition, and the role of creativity in everyday life. It will also explore the manipulations of the market, investigating how stereotypes of race, class, and region affect the commercial valuing of vernacular art. Students in this seminar will work in groups to conduct fieldwork with a self-taught (or folk) artist, whom they will interview and photograph over the course of the semester. We will also host artists in class, and visit some in their homes. ABOUT THE INSTRUCTOR: As

Prerequisites: *First-year students only. Registration Procedures: *Students who are not enrolled in a fall 2014 FYS register online when their registration appointment begins. *Other students register online beginning Nov 17. ABOUT THE SEMINAR: In this seminar we will examine how changing cultural, historical and ecological processes shape patterns of emerging disease. We will pay particular attention to the way human activities modify ecosystems and create new environments. Through in-depth reading, discussions, and class projects we will examine how ecosystems are shaped by disease, how disease shapes ecosystems, and how cultural processes (e.g., population movements, transportation networks, economic shifts, landscape modifications and other built environments) contribute to emerging and reemerging diseases worldwide. Through focus on particular, diseases, outbreaks, and epidemics, we will study pathogen-host coevolution, virulence and pathogen evolution, host immunity, spatial and temporal trends in global health and disease, epidemiologic transition theory, and emerging diseases. ABOUT THE INSTRUCTOR: Mark Sorensen is a biological anthropologist specializing in biocultural and evolutionary approaches to human variation. He studies biomarkers of stress, inflammation and immune function in order to understand how social, cultural and ecological change affects health. Professor Sorensen is particularly interested in the biological impacts of globalization, modernization, and cultural change, in

Prerequisites: *First-year students only. Registration Procedures: *Students who are not enrolled in a fall 2014 FYS register online when their registration appointment begins. *Other students register online beginning Nov 17. ABOUT THE SEMINAR: This first-year seminar considers how gender, global travel, and tourism come together in the contemporary world. We will examine gender differences (as well as differences of race, class, sexual orientation, national origin) in the experiences of travelers as well as of those who work in the service industries that accommodate travelers' needs. We will also examine the gendered and racialized ways in which travel destinations are represented and marketed. Among the questions we will ask are the following: How are 'exotic' locations portrayed as feminine? How are men and women treated differently as they participate in transnational currents of tourism? When and where are gender and sexual identities turned into commodities through tourism? How are power relations negotiated and what prospects are there for communities of women and men in the global South to actively construct the terms of their engagement with travelers from the global North? ABOUT THE INSTRUCTOR: Florence Babb is a cultural anthropologist specializing in gender and sexuality as well as race and class in changing contexts in Latin America. She has taught previously at Colgate University, the University of Iowa, and the University of Florida & she is a newcomer to Carolina. Babb's courses

The focus of this class as follows: Anthropology of Science: Social Issues in Genomics This course will focus on the ethical, legal, and social issues in genomics as it moves from scientific discovery toward everyday clinical medicine. We will draw from anthropological expertise and theory from the outset of the course. This course is intended for advanced students in the social sciences coming in with a foundation of anthropological knowledge.

Reserve Capacity:		17-OCT-2014	RC CLAS UG FFYS	STDTs	Reserve Enrl Cap: 24		Reserve Enrl Tot: 0	
Prerequisites: *First-year students only. Registration Procedures: *Students who are not enrolled in a fall 2014 FYS register online when their registration appointment begins. *Other students register online beginning Nov 17. ABOUT THE SEMINAR: This course explores the intersection of science and Islamic visual arts (art, architecture and material culture) over time, from the medieval period to the present day. Topics will include the visual arts and related to astronomy, mechanics, geography, medicine and magic, and mathematics. We will experiment with processes of making (an astrolabe, geometries of architectural decoration), reflecting on what these processes may reveal about the objects and their makers and users. We will read primary texts (in translation) that help us understand the connections between art, science, and Islamic civilizations. Finally, we will consider how art, objects, and architecture express meaning and illuminate the social history of Islamic civilizations. ABOUT THE INSTRUCTOR: Glaire D. Anderson is Associate Professor Islamic Art History at the University of North Carolina at Chapel Hill. She received her PhD from the History, Theory & Criticism of Architecture/Agia Khan Program for Islamic Architecture at MIT and has held fellowships from the American Council of Learned Societies, the College Art Association, and the Society of Architectural Historians. Her specialty is Islamic art and architecture during the caliphal period (roughly 650-1250). Cross-cultural exchange

In this course you will explore the history of Islamic civilizations in art, architecture and material culture. From the Dome of the Rock to the Taj Mahal, to contemporary works found around the globe, we will focus on understanding the social, historical, political and religious meanings and contexts of Islamic visual production. No previous background in Art History or Islam is necessary to take this course. The Honors recitation section provides an

opportunity to develop strong visual skills along with the critical thinking, writing and verbal skills fundamental to a liberal arts education, in a small group setting. Using works of architecture and art on the UNC campus you will learn how to look closely, how to formulate questions and hypotheses based on close observation, and to consider how works of art, architecture and material culture function as meaningful creations in Islamic societies historically and in today's interconnected world. By the end of the course you will have a basic grasp of the chronology and the rich diversity of Islamic civilizations and their visual cultures from the medieval period to the present day. The course fulfills VP, WB & BN GenEd Requirements & the following Minors: Medieval and Early Modern Studies; Islamic & Middle Eastern Studies; Arab Cultures. Glaire Anderson is Associate Professor of Islamic Art History. She received her PhD from the History, Theory & Criticism of Architecture/Aga Khan Program for Islamic Architecture at MIT, with a specialty in the caliphal period. Anderson Honors Carolina students register online when their registration appointment begins. Other students register online beginning November 17. Enrollment capacity increases on Nov 4 (5), Nov 6 (10), Nov 10 (15), and Nov 12 (20).

Prerequisites: *First-year students only. Registration Procedures: *Students who are not enrolled in a fall 2014 FYS register online when their registration appointment begins. *Other students register online beginning Nov 17. ABOUT THE SEMINAR: Many people know that India is famous for its extravagant Bollywood musicals with elaborate song-and-dance routines. But less people know that there is also a tradition of art films in India. In this course students will have the opportunity to experience some of the great films by directors like Satyajit Ray, Guru Dutt, Ismail Merchant/James Ivory, and Deepa Mehta. Students will also be introduced to important themes in South Asian culture and history over the past 200 years, as well as some of the formal elements of filmmaking to help them better read and appreciate the text of film. There will be weekly film screenings and reading assignments on Indian cinema, South Asian culture, and film theory. Some of the topics to be considered in the course include British colonialism, Mughal culture, gender issues, language issues, village life, Indian traditions and modernity, terrorism, and communalism. ABOUT THE INSTRUCTOR: Pamela Lothspeich grew up in Fargo, but came to Carolina via Iowa City, India, Seattle, New York, Chicago, East Lansing, and the Bay Area. Her Ph.D. is in Comparative Literature (Columbia University 2003), but she enjoys teaching courses about all manner of subjects related to South Asia. When not teaching, she writes about the continuing

ASIA	63	001	11746	FYS: JAPANESE TEA CULTURE	Lecture (Face to Face Instruction)	3	A

Attributes: HS- Historical Analysis, BN- Beyond the North Atlantic							
Reserve Capacity:		17-OCT-2014	RC CLAS UG FFYS	STDTS	Reserve Enrl Cap: 24		Reserve Enrl Tot: 0

Prerequisites: *First-year students only. Registration Procedures: *Students who are not enrolled in a fall 2014 FYS register online when their registration appointment begins. *Other students register online beginning Nov 17. ABOUT THE SEMINAR: This seminar will explore the history of tea culture in Japan with particular attention to the emergence in the 16th-17th centuries of the ritualized practice often referred to in English as the tea ceremony (chanoyu). Merchants, Buddhist monks, warlords, European Jesuits, and specialized tea masters all participated in this cultural practice, which remarkably has survived to the present day as a cornerstone of Japanese tradition. Students will investigate some of the following questions inside and outside of class: Where did the distinctive aesthetic principles of tea culture come from? What literary and historical sources are available for the study of tea? And how can we use extant art objects in institutions such as the Ackland Art Museum to understand the history of tea culture? ABOUT THE INSTRUCTOR: Morgan Pitelka is a historian of premodern Japan who specializes in tea culture and the lives of the samurai. His research into a fifteen-generation family of Japanese potters who work exclusively in the tea world resulted in the book Handmade Culture: Raku Potters, Patrons, and Tea Practitioners in Japan as well as two edited volumes on art and tea. He is currently writing a study of art in the career of Tokugawa Ieyasu (1543-1616), the founder of the Tokugawa

Prerequisites: *First-year students only. Registration Procedures: *Students who are not enrolled in a fall 2014 FYS register online when their registration appointment begins. *Other students register online beginning Nov 17. ABOUT THE SEMINAR: This seminar is an introduction to the field of Israeli Popular Culture and is oriented toward students who are interested in learning about Israeli popular culture in a transnational and interdisciplinary frame. Focusing mainly on Israeli popular music, students will make a journey through different genres and styles that represent the cultural richness developed since early Zionism, going through deep social and cultural changes during the last two centuries. In addition, along the way students will engage with interdisciplinary cultural productions such as literature, film, television, and dance through their interaction with different musical styles helping students ultimately develop a broad and knowledgeable understating of social and cultural processes in the Israeli society. ABOUT THE INSTRUCTOR: Ana Laura Sprintzik was born in Argentina and grew up in Israel. She is a foreign language teacher and a community educator. In Argentina, before coming to the US, she completed dental school and practiced dentistry for two years. During that time, she was involved in National Health Education Campaigns as well as research initiatives in undeserved local communities. After coming to the US in 2005, Ms. Sprintzik earned a Master of Education from

While its individual form and content may differ greatly, the feast or banquet functions as a strong symbol in most global communities. Food and feasting often defines community by establishing a connection between those who eat, what they eat and how they eat: as such it shapes national and cultural identities. As it is portrayed in Western philosophy from the seminal banquet in the pages of Plato's Symposium, the feast is simultaneously erotic and philosophical. It has the potential to descend into gluttony or to rise to the level of the sublime. Feasting can represent communion or transgression, just as eating "the flesh" may symbolize one of Christianity's most central rites or one of Western society's central taboos. In Asia, the influence of Buddhist reincarnation has instilled additional meanings and taboos upon the consumption of food. The multiple purposes and nuances of food make it a rich theme in literature, film, and the visual arts. The food and banquet film has recently become a genre unto itself, and the outpouring of films are helpful in understanding cross-cultural differences in the social and philosophical understandings of what it is to be human. In addition to readings in philosophy, theology, and literature, we will study food films, work in the digital humanities, invite guest speakers, and create our own final feast. CROSSLISTED WITH CMPL 255H. Dr. Brodey was born in Kyoto, Japan, and studied at the Albert-Ludwigs Universität in Freiburg, Germany, as well as at Waseda University in Honors Carolina students register online when their registration appointment begins. Other students register online beginning November 17. Enrollment capacity increases on Nov 4 (2), Nov 6 (4), Nov 10 (5), and Nov 12 (6).

Service-learning is an instructional strategy throughout the length of the course in which the service component aligns with and enhances the course content. There is collaboration between the community partners, students, and faculty. The community needs are central to the course; the community partners

are involved throughout the course in identifying and assessing their needs. Students, think, share and create reflective products as evidence of learning. Students have a minimum of 30 hours service requirement with the community partner. In this course, our community partner is the UNC Hospital Blood Donation Center located in the NC Cancer Hospital. Class time will be spent with the organization representatives to learn the biology of blood donation (including donation of blood cells, stem cells and bone marrow) and how these blood products are used for the treatment of blood disorders and other medical conditions. In addition, class time will be spent actively developing, implementing and evaluating a social marketing plan with a goal of helping the Blood Donation Center to increase collection of blood products to meet the ever-increasing needs of patients at UNC Hospitals. Students provide a large base of donations, making the partnership between this community partner and UNC students critical.

2.0 CREDIT HOUR COURSE Dr. Mazepa received his MD degree from the University of Wisconsin-Madison in 2006, where he also completed his training in Internal Medicine. He came to UNC in 2009 where he first completed Honors Carolina students register online when their registration appointment begins. Other students register online beginning November 17. Enrollment capacity increases on Nov 4 (6), Nov 6 (12), Nov 10 (18), and Nov 12 (24).

Course includes a minimum 30-hour service learning component

BIOL	295	401	3943	UNDERGRAD RESEARCH BIO	Lab	3	A
(Face to Face Instruction)							
Application required - pick up in 213 Coker Hall. After approved, dept will register you. Contact Dr Coble (jcoble@bio.unc.edu) for more info.

Our objective in the Honors Section of Biology 565 (Conservation Biology) is to take the course material from the Biology 565 lectures and find new, interactive, and collaboratives ways to explore and learn about course topics from lectures and readings. In the past, we've examined and dissected the biological science embedded, unseen, in contemporary events and news stories. We've applied course topics to North Carolina environmental problems. We've devised original games that are based on course material, including predicting the future of endangered species populations and community decision making about conservation issues. We've invited in practitioners in the field for guest lectures with particular reference to what their day-to-day jobs are like, how they found their way to particular careers, and how students can approach the job market and careers in conservation science. But we will design our objectives, methods, and schedule together as a class early in the semester. PREREQUISITE: BIOL 201 OR PERMISSION OF THE INSTRUCTOR. Peter White is a plant ecologist and conservation biologist with research interests in biodiversity, forest and ecosystem dynamics, and the effects of natural disturbances like fire, wind, and flood, and human ones like habitat loss and fragmentation, invasive species, and climate change. His research often focuses on conservation problems and he has a long history of research in Great Smoky Mountains National Park, including the All Tax Biodiversity Inventory project. Honors Carolina students register online when their registration appointment begins. Other students register online beginning November 17. Enrollment

Prerequisites & Course Attributes: *Prerequisite: CHEM 101/101L and 102/102L; Pre/corequisite: 241H *CHEM 241H counts toward Honors annual two-course requirement, CHEM 245H does not. Registration Procedures: *Department of Chemistry consent required. COURSE DESCRIPTION: In the honors analytical methods lab students will use chromatographic, spectroscopic, and electrochemical methods to carry out a real world analysis. Students will work with real world samples throughout the semester and the lab course will emphasize group work. A portion of the lab will involve a group research project. Groups will be given a problem to solve and the time to design their own experiments, run their experiments, collect data, and give a poster presentation on their group research project. What is great about the group research is that each group decides on their own direction, what techniques they wish to use, and need to use, to solve a particular analysis problem. ABOUT THE INSTRUCTOR: My primary research interests lie in the area of chemical education. In particular, I am interested in the development and implementation of new and better methods by which to teach fundamental chemical concepts in the classroom and laboratory. Currently my role in the undergraduate chemistry program at UNC-CH involves undergraduate instruction, curriculum development and the training/supervision of graduate students as laboratory teaching assistants.

Continuation of CHEM 261H with particular emphasis on the chemical properties of organic molecules. This course will be similar to CHEM 262, but with a greater emphasis on class discussion and on discussion of contemporary research problems. PREREQUISITE: CHEM 261 OR 261H INSTRUCTOR CONSENT REQUIRED. Simon Meek is Assistant Professor of Chemistry. Researchers in Dr. Meek's group are involved with the discovery, design, and development of new chiral catalysts and catalytic methods for chemical synthesis. They focus on developing practical and effective catalysts that enable the use of simple and abundant starting materials for useful carbon-carbon and carbon- heteroatom bond forming reactions. Researchers are interested in understanding reaction mechanisms (efficiency and selectivity) as well as demonstrating and challenging catalytic transformations (reliability) in efficient enantioselective total synthesis of complex biologically important molecules. Areas of interest in Dr. Meek's research program include catalysis, stereoselective organic synthesis, and organometallic chemistry.

The course will involve a very close reading of Homer's Iliad and Odyssey and Vergil's Aeneid, the three epics that formulated the bases of Greco-Roman civilization and provided the models of heroism and human values for the Western Tradition; and also raised fundamental questions about the individual's relationship to society. In addition, we will read Book 3 of Apollonius Rhodius' Argonautica, which forms a bridge between Greek and Roman epic. The students will discuss questions that arise in the assigned readings, prepare brief in-class analyses, and write three papers. There will also be a comprehensive final examination. FIRST YEAR STUDENTS ONLY. William Race, Paddison Professor of Classics, received his B.A. from Michigan and Ph.D. from Stanford. He has published numerous books and articles on classical Greek poetry, ancient epic, and the influence of the classical tradition on English poetry.

Honors Carolina students register online when their registration appointment begins. Other students register online beginning November 17.

Prerequisites: *First-year students only. Registration Procedures: *Students who are not enrolled in a fall 2014 FYS register online when their registration appointment begins. *Other students register online beginning Nov 17. ABOUT THE SEMINAR: No other ancient writer explored the relationship between the sexes as acutely as the tragedian Euripides, and none has inspired such visceral reaction from ancient and modern audiences. How did Euripides shape the Greek mythological tradition to interrogate contemporary conceptions of gender? Why did this writer, working within a society as patriarchal as ancient Athens, create such socially transgressive heroines as Medea and Phaedra? And why have critics, from ancient Athens to today, reached such divergent judgments about the tragedian, with some labeling him a `misogynist; and others a `proto-feminist;? This seminar will discuss these and related questions through a close reading of nine Euripidean plays that have had a profound influence on drama and literature for over two millennia. In the final weeks of the seminar we will also watch and discuss some modern adaptations ; by the filmmakers Cacoyannis, Pasolini, and Lars von Trier ; in order to consider Euripides; relevance to today;s gender concerns. Since scenes of verbal contest are characteristic of Euripidean tragedy, assignments will include short oral presentations in the form of a debate about the choices made by the various characters. Written assignments will consist of three short papers and a

Prerequisites: *First-year students only. Registration Procedures: *Students who are not enrolled in a fall 2014 FYS register online when their registration appointment begins. *Other students register online beginning Nov 17. ABOUT THE SEMINAR: Every moment of our lives is spent in some {place.} We live in various places; we work in places; we play in places; we remember and sanctify certain places. This seminar will explore how it is that we come to understand what and how these places are meaningful in our lives. In doing so, we will look at such places {rhetorically}; that is, how were they designed to persuade those of us who inhabit them, how we actually experience them, and how we make sense of them in terms of our individual lives as members of families, communities, and as citizens of the nation. We will seek to understand these places through readings from different disciplines, field trips to a number of sites (including the Carolina campus, Franklin Street, shopping malls, commemorative sites, and others), class discussion, short reaction papers and reports, and a group research report at the end of the semester. ABOUT THE INSTRUCTOR: Bill Balthrop is a professor in the Department of Communication Studies. His research and teaching interests include how rhetoric played an important role in the construction of both American and Southern identity, as well as rhetorical theory and criticism. His interest in the relationship between rhetoric and place emerged from an interest in US national commemoration,

Prerequisites: *First-year students only. Registration Procedures: *Students who are not enrolled in a fall 2014 FYS register online when their registration appointment begins. *Other students register online beginning Nov 17. ABOUT THE SEMINAR: This seminar takes an historical approach to the relationship between popular culture and technological change, focusing on how artists and other workers in the film, TV and especially music industries have incorporated new technology into the production, distribution and consumption of popular cultural products and experiences. From vinyl records to CDs to mp3s, we will track pivotal format `upgrades, and analyze their aesthetic, economic, legal and political ramifications. Controversies such as sampling and piracy will be debated in class, and influential companies including Apple and Amazon will be subject to our collective research. Students, own expertise and investments in pop culture will inform discussions and, ideally, research projects culminating in individual terms papers and group presentations. ABOUT THE INSTRUCTOR: Michael Palm,s teaching interests include media history and cultural studies of technology. His research focuses on technologies introduced into people,s everyday lives, and their role in the emergence and interplay between new forms of work, commerce and consumption. He is finishing a book about the history of self-service technology, spanning from the telephone dial to the ATM. His new book combines labor ethnography,

Interpersonal communication is about our connections with other human beings. Communication shapes our understandings of ourselves, others, organizations, and social systems. Our communication creates and recreates the social worlds in which we reside. We often take interpersonal communication for granted, assuming that we already know much of it because we engage it on a daily basis. Yet, through engaged study, we will come to realize that interpersonal communication is complicated, consequential, and crucial. This course provides a space to openly analyze and discuss the role interpersonal and organizational communication plays in our understanding of self, other, and everyday life as constituted through the relationships that we create, sustain, and sometimes end. CROSSLISTED WITH MNGT 120H Katie Margavio Striley is an Assistant Professor of Interpersonal Communication in the Department of

Communication Studies. Her primary research interests include exclusive and inclusive communication and the construction of systems of exclusion. Specifically, she explores the creation, maintenance, and termination of exclusive communication patterns, such as stigma, ostracism, bullying, and other forms of social rejection, as well as inclusive communication like dialogue, deliberation, and other forms of egalitarian communication. Her most recent project explored intellectually gifted adolescents' experiences of ostracism at school. Honors Carolina students register online when their registration appointment begins. Other students register online beginning November 17. Enrollment capacity increases on Nov 4 (5), Nov 6 (10), Nov 10 (15), and Nov 12 (20). This course is cross listed.

Prerequisite, COMM 120

Course description: The "dark side" of communication is a metaphor intended to describe the study of disruptive, dysfunctional, distorted, distressing, and destructive aspects of human communication and the direct and indirect effects of human exploitation. This course explores the dark side of communication -- the side that allows us to lie, cheat, exploit, objectify, misguide, resist, stigmatize, judge, reject, and exclude. Along the way, it provides the opportunity to explore a variety of theoretical perspectives and apply them to the everyday problems we face in our interpersonal encounters. A sample of topics discussed throughout the course include: deviants, rebels, outsiders, ostracism, exile, peer rejection, social judgments, surveillance and policing, stigma, alienation and loneliness, conformity, group think, deceit, gossip, secrets, revenge, and abuse. Prerequisite, COMM 120. This course is reserved for COMM majors for the first two weeks of registration. Nonmajors can enroll beginning November 17th. This course has prerequisite requirements.

Course topic: The Dark Side of Interpersonal Communication

This course focuses on literary expressions by native, Latina, African, African American, and Asian American women reflecting intersections of gender, sexuality, ethnicity, class, and culture in the United States. With contextual readings in feminist thought across race and culture, theories of difference, theories of globalization and globalism, and postcolonial and decolonization theories; this course examines how each female subject imagines and negotiates her personhood. How, for example, does each woman embrace, amend, scrutinize, and/ or relinquish her role as daughter, sister, mother, wife, partner, and citizen? How does the intersection of race, culture, and class impact each woman's sense of self as citizen, as woman, and as human? Course participants will create performances (live, mediated, art-object) as well as research papers as critical tools in analyzing course materials. "Performance" will serve as a process-oriented, participatory, and experiential way of critically engaging our theme. PREREQUISITE: COMM 160. CROSSLISTED WITH WMST 561H.

Professor Alexander Craft's research analyses dialectical constructions of {blackness} and performances of black cultural nationalisms in the Americas. She is interested in the ways in which twentieth and twenty-first century African-descended communities use literary and performance practices to argue for rights of citizenship and map differential terrains of {blackness}. More specifically, her research and teaching examine the relationship among colorism, Honors Carolina students register online when their registration appointment begins. Other students register online beginning November 17. Enrollment capacity increases on Nov 4 (4), Nov 6 (8), Nov 10 (12), and Nov 12 (18). This course has prerequisite requirements. This course is cross listed. Students may also enroll in WMST 561H-001.

This course has prerequisite requirements. Detailed course description: "I know that many persons complain that they are tormented by the uncertainties of life, by its ambiguities, or by the fact that there seem to be no final answers But, still, if I had to end my life on some final note I think I would like it to be a question, preferably a basic one, well posed and challenging, and beckoning me on to where only others after me may go, rather than a terminal conclusion--no matter how well-documented." -George Kelly The purpose of this course is to expose us to some of the major theories in the field of interpersonal communication. George Kelly's sentiments reflect a good deal of what I want to accomplish in this course. I want us to learn about the theories of interpersonal communication by asking meaningful theoretical questions and pursuing a variety of possible answers to those questions. We will read and contemplate a few "basic and well posed" questions that scholars in the field of interpersonal communication have addressed. You will search for answers as you study these theories. You will also see that some of these questions have implications for you your own life. I hope you will find that your search for answers provides you with more interesting questions, not terminal conclusions. We will identify these questions within some of the more important theoretical perspectives that have been central to the interpersonal communication field. Interpersonal communication has been studied at a Permission of the instructor for nonmajors. This course has major restrictions.

This course is reserved for COMM majors for the first two weeks of registration. Nonmajors can enroll beginning November 17th. Detailed course description: The purpose of Hate Speech is to expose students to the nature of hate in American life. As we attempt to understand the essential qualities of hate we will learn that hate is made possible through communication (sometimes in the form of hate speech) and human perception (sometimes in the forms of stereotypes and bias). We will learn that hatred is sustained through the imposition of racist, sexist, and heterosexist ideologies that privilege Whiteness, maleness, and heterosexuality. Sometimes these ideologies are explicitly understood by the people who use them. Sometimes these ideologies and the assumptions underlying them are only implicitly understood and we may be relatively unaware of their influence. We will also learn that hate may also be resisted through communication. Students will learn how communication may serve to teach respect and tolerance, rather than hate. The word "tolerance," like most words, has multiple meanings. Tolerance should be understood in this context as a willingness to embrace and value social and cultural differences, a definition of this term adopted by the Southern Poverty Law Center. Knowledge of the essence of hate will place students in a position to fight hate when they encounter it in their own lives. Just as students can learn to be vigilant to the presence of hate in their own lives they can learn

Permission of instructor required for students lacking the prerequisite. Class meetings may also be held in the following alternative locations: Swain Hall 200A, Swain Hall 201A, and Swain Hall 106A. Detailed course description: Documentary filmmaking's currency is real life and its current popularity is in no small part a reflection of our desire to see that life represented accurately and honestly. In a frenetic media-saturated culture, to pay sustained attention to a person, a community, or a social phenomenon can feel like a radical act-- an act fueled by moral indignation, by a commitment to expose injustice or simply by a need to understand another human being's experience. That is what documentary filmmakers do and it's what you'll learn to do in this course. Situated somewhere between art and journalism, documentary films reflect a range of approaches from the strictly observational to the reflexive ethnography, from interview-driven expositions to more poetic treatments. In response to readings, screenings, and class discussions, students will make their own short documentaries that reflect some of these approaches. You will learn how to research with an eye to visual storytelling, write treatments, plan shoots, conduct interviews, and shoot and edit documentary material. Other topics will include earning the trust of your subjects, ethical challenges, and how to reach your audience. A significant portion of class time will be devoted to workshoping student films. This course is reserved for COMM majors for the first two weeks of registration. Nonmajors can enroll beginning November 17th. This course has prerequisite requirements. Prerequisites, COMM 130 (grade of C or better) and COMM 230

Permission of the instructor for students lacking the prerequisites. Detailed course description: The stuff of media culture today - from rap to apps - circulates within commercial markets that are often trans- and inter-national (if seldom "global" in any literal sense); and the production, distribution and consumption of popular culture (e.g., rap) and media technology (i.e., apps) seldom occur anymore within one nation, or even region of the world. In this course we will study media forms, content and cultures, moving across borders both official and de facto. Our primary subjects will be popular culture, media technology and the people who produce and consume them. Our guiding questions will be organized around the relationships of each to commerce and social change. Critical-cultural and political-economic methods of analysis will be taught. Case studies will focus on the film, music, fashion, social media and consumer electronics industries. Animating concerns will range from the labor of cultural production - in mines and factories as well as on set and in the studio - to the environmental impact of digital technology. Students will write an original research paper on a(n approved) topic of your choice. This course is reserved for COMM majors for the first two weeks of registration. Nonmajors can enroll beginning November 17th. This course has prerequisite requirements.

Permission of instructor for students lacking the prerequisite. Class meetings may also be held in the following alternative locations: Swain Hall 200A and Swain Hall 106A. This course has a Monday evening screening. The screening will be held in Swain 106A. Detailed course description: From watching mainstream media we are familiar with the dominant conventions of film and video. There is also a lesser-known body of work that radically challenges these conventions. This work can be compelling, disturbing, confrontational, provocative, frustrating, and inspiring. Experimental Video will explore this alternative media by viewing a mix of classic and contemporary work, by reading essays that interpret, theorize on, and give the history of this form and, most importantly, by having the students create their own video productions that use these productions as models. Performance-based, autobiographical, lyric/visionary, didactic, conceptual/formal, subversions of narrative, subversions of appropriated materials are some of the types of work explored. Their subject matter can range from issues of the body, sexuality, spirituality, gender, family, race, class, psychoanalysis, language, politics, post-colonialism, life, and death. This course assumes a working knowledge of basic video production and postproduction techniques. Time permitting we may cover specific production or post production techniques. These demos will be based to a certain extent on student interests. Since you may be new to the This course is reserved for COMM majors for the first two weeks of registration. Permission of instructor required for enrollment. Course includes a minimum 30 hour service learning component. As a part of this course, students will be working with a food distribution center and residents in the Northside community. Each Thursday after class from 3:30p-5:00p, students will travel to the Northside community to complete their service hours. This is required for the course. Please DO NOT register for the class if you are unable to commit to

the Thursday 3:30p-5:00p schedule. Detailed course description: Initially offered in the spring of 2008, this course is the basis for a deepening partnership with St. Joseph C.M.E. in the heart of Chapel Hill's historic Northside, the community collaborative United with the Northside Community Now (or: UNC NOW), the Sustaining OurSelves (S.O.S.) Coalition that brought development in Northside to a temporary halt in 2010, and the establishment of the Marian Cheek Jackson Center for Saving and Making History in 2009, which formally incorporated as an independent non-profit organization in 2012. The course is dedicated to building the momentum of collective and communal leadership Mayor Kleinschmidt recently called the "tightest collaboration between the University, town, and community" he has ever seen. The course introduces students to foundational work in collaborative ethnography, asset-based community development, and organizing for social change in light of the history of Northside and the mission and principles of our primary field partner,

Course topic: Movement Compositions/Composing Movement Course Description: This course introduces students to compositional strategies commonly used by dance choreographers for creating and structuring movement. Students will work individually and in groups to fulfill movement assignments. We will approach our compositions as the articulation of particular points of view, paying attention to how our bodies "perform" individuality and community. Geared toward dancers and non-dancers alike, this class only requires that students enter with a "beginner's mind:" open, curious, and ready to explore. Students will supplement compositional assignments by viewing and discussing live performances at Carolina Performing Arts. The course will culminate with participation in the University-wide "Lamentation Project" inspired by Martha Graham's iconic 1930 choreography, Lamentation. This course is reserved for COMM majors for the first two weeks of registration. Nonmajors can enroll beginning November 17th.

Course topic: Introduction to Cultural Studies Detailed course description: This course provides an introduction to cultural studies as an intellectual/academic and political practice. It is less a matter of a fixed position or inter-discipline with its own objects, methods, theories, etc.) than an ongoing project to think contextually and in a non-reductionist way, about contexts. It attempts to think complexity, contingency and power together. It brings theory, empirics and politics into a dialogue in which each has its say and none has the final say. Specific formations of cultural studies are the result of-- among other things-- theoretical commitments, analytic articulations of 'context,' 'culture' and power, research methodologies, and political problematics-- always responses to particular contexts. The intellectual work of cultural studies has drawn upon and responded against include various pragmatisms, humanisms, Marxisms, structuralisms, post-structuralisms, post-modernisms and anti-modernisms. The first part of the class will focus on the genealogy, development and expansion of "British" cultural studies, with its roots/routes in the work of Stuart Hall and the Centre for Contemporary Cultural Studies; we will consider its two basic visions for cultural studies: the circulation of culture/power, and conjuncturalism. The second part will address the multiplication of cultural studies as a dispersed and diverse intellectual-political assemblage, looking at some of its leading advocates from a

Course topic: Theorizing Work/Labor Detailed course description: This course engages critical debates about the theory and status of work/labor in contemporary times. We will begin by introducing classic conceptions of work, labor, and un/employment found within social theory and organization and labor studies. Students will be introduced to Marxist and Weberian perspectives on work, Labor Process theory, and the rise of feminist, poststructuralist and postcolonialist critiques. The second part of the course takes up new research that responds to recent developments in late capitalism, technology and popular culture, mapping, for example, the rise of ¿communicative capitalism¿ and new theories of value, the paradox of overwork and burnout amidst underemployment and the disappearance of work, the increasing significance of reproductive, immaterial, and affective labor, and the growing centrality of consumption to work itself. The course will provide students with an in-depth understanding of the changes in the nature of work under industrial capitalism, as well as insight into its current form under neoliberalism and post-Fordism. The course will be of interest to graduate students in communication studies, sociology, geography, and anthropology, amongst others.

Course topic: Decolonizing Methodologies Detailed course description: This class seeks to explore the fundamental connection between critical social theory and qualitative research through readings, discussion, and workshop techniques. The class is divided into three sections: 1. The Problems of Research: Why should research methodology be 'decolonized'? What lineages of critique shape the practice and underlying theory of participatory research today? 2. Methods in Practice: What approaches, from interviews to videos, can research employ to enable greater engagement? What practical issues arise when working with communities to generate knowledge? 3. Student Projects: How can participatory research be integrated into graduate-level research projects? What resources and support, as well as challenges and barriers, do students face in doing participatory research currently? This course is a core course for the Graduate Certificate in Participatory Research.

Course topic: Media Beyond Content: Information Machines Detailed course description: This course is team taught by Dr. Ken Hillis and Dr. Sarah Sharma. Combining cultural, philosophical, and political economic approaches, we focus on the materiality of media-technologies. The course situates this materiality within historical contexts and definitions of history themselves bound up within the social diffusion of different media forms. We begin by looking at seminal/canonical texts by theorists of technology. While these theorists have been variously critiqued as determinist, hyperbolic, or essentializing, it is nonetheless telling that more recent new media theory frequently borrows and extends aspects of these individuals' thought. Ultimately, we are guided by our understanding that the study of the materiality of media-technology is a form of critical practice- without which a robust understanding of the relationships between gender and technologies; labor; mediation; mobility; alternative political formation and information networks; spatiality and temporality would not be possible in media studies, or other disciplines for that matter.

Course topic: Rhetorics of Space and Place Detailed course description: This course invites us to raise serious questions about how space and place are theorized from various disciplinary and interdisciplinary perspectives as well as to think through the ways in which place and space figure into communicative lives. In raising these questions, we will take up the three primary coordinates apparent in the title of the course-- rhetoric, space, and place. Rhetoric, space, and place may seem to some an odd conglomeration, but they are no strangers to one another. In some of ancient rhetoric's most important conceptions, rhetorical invention and memory were theorized as "placed," as evident in the central concerns of *topoi* and *loci*. And communication studies is often partitioned according to contexts that may be understood as differential space; for example, think of rhetoric's public sphere, organizational communication's corporate (in the broadest sense) setting, or family communication's situatedness in a "home." In the latter, modern cases, though, rhetoric (and communication studies more broadly) typically have understood place/space as context, certainly important but not of central concern. There's certainly nothing wrong with such a perspective, but some corners of rhetorical studies have been in the process for the past fifteen-plus years of attempting to re-understand places/spaces as themselves communicative, not simply contexts for communication. Among the questions that I hope we will

Detailed course description: COMM 909 is intended to help you "learn the ropes" of the academic world, especially as they will affect you during your graduate program, although much of what we do will be useful beyond your graduate work. In 909, we will address-- among other topics--information about resources offered to you by professional associations; strategies for establishing a peer network; writing successful academic arguments; applying for fellowships and grants; ethical standards and practices in research; etc. This will function as a proseminar; that is, it will draw on the experience of a number of resource persons-- faculty and advanced graduate students who have a wealth of knowledge about particular subjects, as well as sometimes folks from outside the department. Some of the issues in professional development are contentious, and so it's important to have multiple points of view represented. Please don't forget to always ask your adviser and to follow her/his advice first!

<p>Nearly one in seven Americans has a significant disability; should they be exceptions? Through readings, guest lectures, videos, and projects we will explore the legal, moral, cultural, and technical issues and opportunities raised by this minority you can join at any time. Ideas originated in this class have been successfully used by people worldwide. This is an approved Apples Service Learning course. FIRST YEAR STUDENTS ONLY. Gary Bishop is a professor in the Department of Computer Science at the University of North Carolina at Chapel Hill. His research centers on the use of computers to help people with disabilities. Bishop won the Tanner Faculty Award for Excellence in Undergraduate Teaching in 2003 and the Class of 1996 Excellence in Advising Award in 2005. He was one of the first six professors chosen to be a Faculty Engaged Scholar, named by the Carolina Center for Public Service and the Office of the Vice Chancellor for Public Service to conduct projects that connect faculty work and community needs. He also received the Kauffman Entrepreneurial Fellowship.</p> <p>Honors Carolina students register online when their registration appointment begins. Other students register online beginning November 17.</p>

Attributes: PH- Philosophical and Moral Reasoning								
Reserve Capacity:		01-OCT-2014 RC PLAN UGRD HONORS		Reserve Enrl Cap: 18		Reserve Enrl Tot: 18		
Computers and Society explores some of the many cultural, social, and ethical issues that arise from individuals', groups', and societies' use of information and digital technologies, particularly the Internet. Likely topics include, but are not limited to, the history of the Internet; attention and distraction; virtual worlds, communities, selves, and relationships; and computing in science fiction. Research and creative projects and presentations will utilize no-code or code-light digital tools, and basic instruction in their use will be provided. No prior programming experience is necessary. Considerable reading, writing, and collaborative work. Tessa Joseph-Nicholas (http://tessa.web.unc.edu) is the Director of Digital Arts and Humanities Projects and a Senior Lecturer at the Department of Computer Science at the University of North Carolina at Chapel Hill. She holds an MFA in Creative Writing from Cornell University and a PhD in American literature and poetics from UNC-Chapel Hill. She is a co-recipient of a two-year Innovation Grant from UNC's Institute for the Arts and Humanities for the project "Reimagining Gaming: Program in Alternative Games and Digital Innovation" and was named one of two 2013 Digital Innovation Lab/Institute for the Arts and Humanities Faculty Fellows. Honors Carolina students register online when their registration appointment begins. Other students register online beginning November 17. Enrollment capacity increases on Nov 4 (6), Nov 6 (12), Nov 10 (18), and Nov 12 (24).

Prerequisites: *First-year students only. Registration Procedures: *Students who are not enrolled in a fall 2014 FYS register online when their registration appointment begins. *Other students register online beginning Nov 17. ABOUT THE SEMINAR: This seminar will explore the artists, art and technology involved in creating the world of the play. It is intended as an overview for students who want to learn about theatrical design. Students will create their own designs in the areas of scenery, costumes, and lighting for three plays throughout the semester. These plays will be placed outside of their traditional setting while still maintaining the story and themes. Students have placed Shakespeare's A Midsummer Night's Dream in a trailer park and a daycare center for example. Careful historical research, close reading and analysis, text and source material, and collaboration will be the focus of the student projects. In addition, the seminar will look at theatrical technology and how spectacle has evolved from the Greeks to Cirque du Soleil. ABOUT THE INSTRUCTOR: David Navalinsky is the Director of Undergraduate Production in the Department of Dramatic Art and has served on the First Year Seminars Steering Committee. David has taught at the University of Texas at Arlington and the University of Mississippi. David has worked professionally at South Coast Repertory in Orange County California, The Utah Shakespeare Festival, The Illinois Shakespeare Festival, and the Karamu Performing Arts Theatre in

<p>This seminar explores the political and social ramifications of documentary theatre in the U.S. from the 1990s to the present. We will spend the first half of the semester studying interview techniques and reading examples of documentary theatre by playwrights such as Anna Deavere Smith, Heather Raffo, and Moisés Kaufman and the Tectonic Theatre Project. In the second half of the semester, the students will investigate a local community of their choosing and create an interview-based performance as a final project. The class will perform this play for an invited audience at the end of the semester. FIRST YEAR STUDENTS ONLY. Kathryn Hunter Williams received her B.F.A from University of North Carolina School of the Arts and her M.F.A from University of North Carolina at Chapel Hill. As a member of PlayMakers Repertory Company she has performed in Doubt, Romeo and Juliet, Yellowman and String of Pearls. She has also worked with Living Stage, The Negro Ensemble Company, Manhattan Class Company and New Dramatist. Kathryn is currently on the faculty of UNC Dept. of Dramatic Art and will continue exploring the ways the theater can provide insight about our differences and promote a better understanding of our community. She is the performance director for HiddenVoices , a non profit dedicated to bringing life changing stories in to a public forum. Honors Carolina students register online when their registration appointment begins. Other students register online beginning November 17.</p>

This class offers a survey of British drama and theatre practice from the late 1890s to the present. We will analyze texts, screen videos, engage in critical writing and thinking, and explore performance, all of which are intended to enhance your understanding and appreciation of this foundational period in dramatic history. While our treatment is necessarily selective rather than comprehensive, we will attempt a reasonable amount of depth in the course of our journey. We will consider plays in terms of both text and performance: that is, as literature or cultural artifacts, but also as blueprints for action in the theatre. Each work we study is remarkably different, and will give you perspectives on the variety of English drama from the late nineteenth into the early twenty-first century. Approach them all with an open mind and an open heart. And, Anglophile, welcome to the class. Gregory Kable is a Senior Lecturer in the Department of Dramatic Art, where he teaches dramatic literature, theatre history, and performance courses and serves as an Associate Dramaturg for PlayMakers Repertory Company. He also teaches a seminars on American Drama and American Musicals for the Honors program. He has directed dozens of productions at UNC and throughout the local community, and is a graduate of the Yale School of Drama. Honors Carolina students register online when their registration appointment begins. Other students register online beginning November 17. Enrollment capacity increases on Nov 4 (6), Nov 6 (12), Nov 10 (18), and Nov 12 (24).

GREAT BOOKS II: ROMANTICISM, REALISM, MODERNISM An introduction to major literary texts of the nineteenth and twentieth centuries, with some attention given to parallel developments in the arts and philosophy. We'll explore the structure and meaning of each text in its own terms, and at the same time examine how it reflects certain forms and ideas of its period. Throughout the course our emphasis will be on explorations of human consciousness within its setting of space and time. Readings/viewings will be selected from among such artists as : Wordsworth, Turner, Ruskin, Goethe, Tolstoy, Dostoevsky, Proust, Monet, Woolf, Kafka, Camus, Borges, & Soyinka.

Attributes: VP- Visual or Performing Arts, GL- Global Issues								
This course will take you on a film journey through time and space by spanning the history of global cinema from its beginnings to the present and by offering foreign sights and sounds, exotic places, classical and eccentric film styles, familiar and unfamiliar genres, as well as Hollywood milestones along the way. Through a series of films and lectures, we will explore several of the most innovative and influential styles and movements in film history, including German expressionism, Soviet montage, Italian neorealism, "new waves" in post-World War II Europe and beyond, Third Cinema of Latin America and Sub-Saharan Africa, Indian cinema, transnational blockbusters, and Hong Kong martial arts cinema. *This course meets both the Visual and Performing Arts (VP) and the Global Issues (GL) general education requirements. Students enrolling in CMPL 143 must also enroll in one recitation section numbered CMPL 143-601 or CMPL 143-602.

The desert-island scenario involves a sophisticated and culturally central thought experiment in which the constraints of history and society are suspended and human nature is exposed in its putative essence. This course considers the permutations of this scenario in film and fiction from around the world.

This course takes an historical approach to literary theory, with a focus on the questions that define the field of aesthetics. What is a work of art? What social functions does it play? What are the sources of an art work and how does it influence its audiences? We will read works by Aristotle, Kant, Nietzsche, Foucault, Derrida, J. L. Austin, Judith Butler, Martha Nussbaum, and Terry Eagleton as well as some literary texts against which to measure the theorists. Students will write multiple response papers, and four 5-6 essays.

While its individual form and content may differ greatly, the feast or banquet functions as a strong symbol in most global communities. Food and feasting often defines community by establishing a connection between those who eat, what they eat and how they eat: as such it shapes national and cultural identities. As it is portrayed in Western philosophy from the seminal banquet in the pages of Plato's Symposium, the feast is simultaneously erotic and philosophical. It has the potential to descend into gluttony or to rise to the level of the sublime. Feasting can represent communion or transgression, just as eating "the flesh" may symbolize one of Christianity's most central rites or one of Western society's central taboos. In Asia, the influence of Buddhist reincarnation has instilled additional meanings and taboos upon the consumption of food. The multiple purposes and nuances of food make it a rich theme in literature, film, and the visual arts. The food and banquet film has recently become a genre unto itself, and the outpouring of films are helpful in understanding cross-cultural differences in the social and philosophical understandings of what it is to be human. In addition to readings in philosophy, theology, and literature, we will study food films, work in the digital humanities, invite guest speakers, and create our own final feast. CROSSLISTED WITH ASIA 255H. Dr. Brodey was born in Kyoto, Japan, and studied at the Albert-Ludwigs Universität in Freiburg, Germany, as well as at Waseda University in Honors Carolina students register online when their registration appointment begins. Other students register online beginning November 17. Enrollment capacity increases on Nov 4 (5), Nov 6 (10), Nov 10 (14), and Nov 12 (18).

The senior seminar gives CMPL majors the opportunity to synthesize what they have learned, and to expand on that knowledge through intensive work on an individual research project that will culminate in a final paper. Students currently writing a senior thesis will draw on that work for their project; others may choose to develop project based on a new topic related to their current interests. The course will be in part a workshop or practicum for development of research and writing skills, and will include peer review and teamwork as part of that process. The course will also include close reading, analysis, and study of selected works of fiction and literary theory intended to nourish and inform the student's project and future work. This semester readings will relate to the theme of "authors and authority."

This course is designed to introduce students to some of the major strains in literary criticism from the Classical Period to the 18th century. Readings of major authors will be paired not only with literary examples contemporary with our chosen critics, but also with modern day theoretical responses to their works. Our objective is a working knowledge of dominant trends in European literary criticism up to (and including) the Enlightenment, useful in understanding the literature of the successive historical periods and also as a continuing, vital influence on twentieth-century poetics. We will also be devoting some time to the primary non-Classical tradition of early Western literary criticism, namely Biblical interpretation. Authors read include Gorgias, Plato, Aristotle, Aristophanes, Horace, Longinus, Philo, Proclus, Plotinus, Augustine, Scaliger, Luther, Boileau, Sidney, Burke, Young, and Lessing; Homer, Pindar, Callimachus, Ovid, Vergil, Dante, and Pope; and Auerbach, Derrida, Genette, Ricouer, Benjamin, and Bernal.

Prerequisites: *First-year students only. Registration Procedures: *Students who are not enrolled in a fall 2014 FYS register online when their registration appointment begins. *Other students register online beginning Nov 17. ABOUT THE SEMINAR: Will humans go extinct? If so, how? What are the ethical questions involved in human disappearance? How do humans themselves contribute to the possibilities, and what can be done to postpone the inevitable? This seminar will tackle some sobering (and, quite frankly, exciting and interesting) questions by reading cultural and scientific works that address human disappearance. We will read both science and fiction to think about the core concerns of the class. Our texts will include works ranging from *Alien* to the classic 1950s tale *A Canticle for Leibowitz*, from Danny Boyle's *28 Days Later* to Cormac McCarthy's *The Road*. We will ask some fundamental questions about what it means to be human, how we imagine our societies and cultures to work (and not work), and what these texts and questions might tell us about how we are to live now. Students will read novels and short stories, watch movies and TV shows, and read scientific and philosophical papers that deal with human extinction. Students will also be required to write a paper and complete an original research project at the end of term that they will share with the rest of the class. ABOUT THE INSTRUCTOR: Tyler Curtain is a theorist with the Department of English and Comparative Literature. He teaches

Prerequisites: *First-year students only. Registration Procedures: *Students who are not enrolled in a fall 2014 FYS register online when their registration appointment begins. *Other students register online beginning Nov 17. ABOUT THE SEMINAR: The Cities of Modernism is a cross-cultural and inter-medial exploration of representations of the "Great City" in High Modernist works of literature, art, and film. Our choice of cities is necessarily restricted by the time allotted for the course, and so we will limit our examination to Harlem/New York, Paris, St. Petersburg (Russia), Chicago, and London. Materials may include texts by Andrei Bely, W.E.B. Du Bois, T.S. Eliot, Jean Toomer, and Virginia Woolf, paintings by cubists, dadaists, futurists, German expressionists, and artists of the Harlem Renaissance, and the films "Metropolis," by Fritz Lang and "Modern Times," by Charlie Chaplin. Discussions may include reference to contemporary theoretical essays on the modern city by Walter Benjamin, W.E.B. Du Bois, James Weldon Johnson, Georg Simmel, and Oswald Spengler. Students will also be exposed to the historical contexts that surround our primary readings. In the past, a Study Gallery, where original modernist art works related to our course materials are exhibited in a space reserved for our class at UNC's Ackland Art Museum, has been curated for this course by the professor. If possible, a Study Gallery will be dedicated to this class for five weeks during Fall 2011. Teaching methodology for this course

<p>_Pride and Prejudice_, often cited as the best-loved novel in English, is the focus of this semester's course in Austen and present-day responses to her oeuvre. We will begin with in-depth reading of Austen's 1813 novel, with attention to its form (genre and narrative style) and to its historical and biographical contexts; we will examine recent re-workings, in fiction and in film, in light of present-day concerns and the students' interests. Several film adaptations will be considered as part of our research into Austen's current influence. First-time readers of Austen are welcome in the course, as are those deeply familiar with Austen's oeuvre. Interested students are welcome to contact the instructor in advance of registration with any questions or concerns. FIRST-YEAR STUDENTS ONLY. Jeanne Moskal specializes in literature of the British Romantic Period (1780-1830), in travel literature, and in women writers. She has authored and edited books on William Blake, Mary Shelley, and teaching eighteenth- and nineteenth-century women writers. Her book-in-progress is "Jane Eyre's Sisters: Women Missionaries and the Novel in the Age of Fundamentalism."</p> <p>Honors Carolina students register online when their registration appointment begins. In this course, we will focus on speculative fiction--short stories, novels, and films that present alternative conceptions of the worlds we know through critiques of science, society, and identity. From nineteenth-century to twenty-first-century texts, speculative fiction has asked readers not only to think about where our worlds are heading technologically, environmentally, and politically, but the genre also interrogates where we are now and where we have come from. This course spends a considerable amount of time analyzing the implications of form to become conversant in the vocabulary of literary and cultural analysis and to query what choices the authors themselves make constructing and deconstructing their fictional worlds.

An introduction to poetry from across the globe and from ancient times to our own. While we will attend in our readings to the language, forms, contexts, and myriad messages that have long shaped poetry, we will also devote special attention to the connections between poetry and environmental crisis in our own time--seeking in phenomenal poetic images a resource for both imagining and confronting species extinction, and in poetic consciousness a sensory means of potentially transforming ecological damage.

I hope this course will not just teach you more about poetry, but will help you love it! Though poetry can seem a alien and irrelevant today, it has forever been one of the most important forms of expression and communication about the most important aspects of life. We will read poems from early times to today covering a span of time and a range of traditions about war and peace, including: the ancient Greek poem the Iliad; poems about the US Civil War from many perspectives; soldier Wilfred Owens' poems about WW I; African American Louisianan Yusef Komanyakaa's poems about his experiences in the Vietnam war; and poems by Guantanamo prisoners. NO previous experience with poetry is required: just bring energy and curiosity to the class.

ENGL 129--LITERATURE AND CULTURAL DIVERSITY HOW DOES IT FEEL TO BE A PROBLEM?: FROM 1492 TO 9/11 AND #FERGUSON This discussion-based class brings together a series of social texts--literary, filmic, critical, historical--that respond to, comment upon, and struggle with key events in "American" (US-based) history from the conquest of the Americas and its legacies to the events of 2014 in Ferguson, MO. The exploration of race, ethnicity, class, gender, sexuality, religion, and nationality and how they are structured by institutions and social relations and informed by cultural beliefs will form the basis of the course. This will enables us to understand how we participate in and interact with these structures, how we are defined by them, how we create them, and how we can critique and change them. Among the graded work there will be 3-4 essays/papers, two exams, and group oral presentations. Texts include selections and excerpts from: An Indigenous Peoples' History of the United States, by Roxanne Dunbar-Ortiz; Genocide of the Mind: New Native American Writing, edited by MariJo Moore;The Souls of Black Folk, by W.E.B. Du Bois; and spoken word poetry by Suheir Hammad. Films: Aguirre, The Wrath of God, by

Werner Herzog; *The Muslims are Coming* by Negin Farsad, Dean Obeidallah, & Andrew Mendelson; and *The Untold Story of Emmett Luis Till* by Keith Beauchamp. The Round House, by Louise Erdrich; *How Does It Feel to Be a Problem?: Being Young and Arab in America*, by Moustafa Bayoumi; *Arab in America*, Toufic El-Rassi;

This course is largely a study of perceptions and perspectives. It will examine first the well-documented European views of Native Americans presented in historical accounts and on artists' canvases, views which tell us as much about Europeans as they do about Natives. Then it will sample the explosion of perspectives presented by Native American novelists, poets, short story writers, and film makers whose voices, having been ignored for centuries, eloquent provide alternative views of themselves and of America. Because art is not produced in a vacuum, the course will also explore political, social, and cultural issues which have influenced each group's perception of the other. Texts: Erdrich, Tracks (ISBN: 0060972459) Alexie, The Lone Ranger and Tonto Fistfight in Heaven (ISBN: 0802141676) McNickle, The Surrounded (ISBN: 0826304699) Welch, Fool's Crow (ISBN: 0140089373) Rowlandson, The Narrative of the Captivity and Restoration of Mrs. Mary Rowlandson. While the prime effort of the course will be the ten poems that each student will write and revise, we will also review closely the basic elements of poetry, such as imagery, figurative language, sound repetition, rhythm, with a mind to the potential of those elements in the student's own writing. In addition to these readings in the textbook, there will be assignments in texts on the reserve shelf, group reports on fellow students' poems, quizzes, and a mid-term exam. Each student will also keep a notebook of observations, impressions, quotations, isolated images that may give rise to poems, what have you. Most classes will begin with the reading of a contemporary poem, each student having an assigned day for that duty. For the most part, however, we will be writing poems and attempting to assess their strengths and weaknesses in open class discussion. Text: *An Introduction to Poetry*, ed. Kennedy & Gioia, 10th edition. FIRST YEAR HONORS CAROLINA STUDENTS ONLY. Shapiro has published seven books of poetry (including *The Dead Alive* and *Busy and Mixed Company*), a book of criticism, a translation of *The Oresteia*, and two memoirs (*Vigil* and *The Last Happy Occasion*). He was presented the Kingsley Tufts Award, a prestigious national prize, in 2001.

The goal of this course is to enable each of you to think more critically and write more powerfully by learning to analyze and critique movies more deeply and effectively. The course is titled "Re(why)nd" for three reasons. One, to study movies more closely than normal, you must do things like rewinding tape or DVD continually. Two, it's not enough to simply review a particular scene or entire film repeatedly--you must constantly seek to answer questions that emerge from careful viewing: Why does "The Godfather" begin with a long wedding scene? Why does Peter Sellers play multiple roles in "Doctor Strangelove?" Why does the "Wizard of Oz" change to color film stock? Why did the cinematographer in "Amelie" digitally add blue highlights to red scenes? Why bowling in Columbine? Three, since movies are such an enormously powerful contemporary media, we are each literally, culturally, historically, and ideologically rendered by the choices moviemakers make. Thus, it seems wiser to work to grasp movies rather than to allow them to grasp and work you. This course is discussion based, screening 28 films as well as making a short film of your own. Todd Taylor is a Norman and Dorothy Eliason Distinguished Professor. His earliest research examined scholarly writing and publication and resulted in two coedited collections: Writing and Publishing for Academic Authors (Rowman & Littlefield) and Publishing in Rhetoric and Composition (SUNY Press). His more recent work investigates how concepts of literacy are Honors Carolina students register online when their registration appointment begins. Other students register online beginning November 17. Enrollment capacity increases on Nov 4 (6), Nov 6 (12), Nov 10 (18), and Nov 12 (24).

"Film and Culture" examines the ways in which culture and history shape and are shaped by motion pictures. In this course, we will focus specifically on films that highlight race and racial issues. The course emphasizes discussion and a broad range of screenings, as opposed to canonical film studies topics and movies, and uses comparative methods that group related films as well as films and texts. The purpose of this strategy is for students to broaden their perspectives on film by appreciating connections between the past and the present, between established ideas and reinterpretations of those ideas, between texts and their screen adaptations, and between films and filmmakers' all the while interrogating the role that race plays in American film's history, as well as in related global cinema. By playing the familiar against the unfamiliar, this course encourages students to reexamine what is "familiar" and "normal," as well to question how the movie screen both influences and reflects audiences' views about race.

"Mystery Fiction" (ENGL 147) surveys the prose genre of modern mystery fiction. The course introduces students to significant literary works, movements, publishing trends, and debates that stimulated the development and popularity of 19th century mystery fiction and have carried the genre through its postmodern/contemporary iterations. Readings include works by Edgar Allan Poe, Arthur Conan Doyle, Agatha Christie, Raymond Chandler, Dashiell Hammett, Thomas Pynchon, Paul Auster, Walter Mosley and Michael Chabon. Students will gain proficiency in the analysis and discussion of literary works, analysis of rare books, and related critical materials. The course also offers to students an opportunity to engage topics that have recently appeared at the interface between traditional print and emergent digital media cultures. Topic areas related to the latter include the history of mystery-specific periodicals and mass-market publishing, how the visual aesthetics of the digital book have re-shaped genre fiction, how literary works circulate in a digital marketplace, and how new media afford new opportunities for digital literary scholarship (digital curation, digital research methods and digital archives).

Open seats reserved for English majors through early registration. We will work with eight representative plays--comedies, histories, tragedies, and romances--from the full breadth of Shakespeare's career in the theater. Our goal will be to develop a series of strategies for reading the plays as both formal, aesthetic creations and as cultural agents that participate in the creation and questioning of the age's social, political, economic, and religious formations. We will also look closely at the conditions of staging in early modern English theaters and the ways in which Shakespeare's plays explore and expand upon the conventions of dramatic representation. Instruction will involve informal lecturing combined with extensive discussion and group work. You will be asked to complete one critical essay, 6-7 pages in length, daily quizzes and journal entries, and a final examination on the semester's work. Required text: Gwynne Evans, The Riverside Shakespeare, Houghton-Mifflin, 2nd edition.

Open seats reserved for English majors through early registration. A survey of representative comedies, tragedies, histories, and romances by William Shakespeare. We will consider the social, political, philosophical, and historical ramifications of the plays in their early modern context; moreover, we will examine Shakespeare's position in the modern literary canon and suggest the relevance of his plays to our time. This class will also emphasize the performance and adaptation of Shakespeare's plays, with works as varied as accounts of Ira Aldridge's portrayal of Aaron in Titus Andronicus in the 19th century to modern film adaptations such as the BBC Hollow Crown series. Required text: The Norton Shakespeare. 2nd edition.

English 265 Section 1: Remembering, Repressing, and Reconstructing Slavery After the abolition of slavery in the United States in December 1865, African American writers, many of whom had experienced the institution first-hand, were determined to help build a new America built on freedom and equality. They found, however, that many white Americans, while convinced that the country had done well to rid itself of human bondage, still harbored beliefs about race and race relations that harked back to the slavery era. Between 1865 and 1940, African American writers struggled to educate white readers about what slavery had been and how its backwash, segregation and white supremacy, were corrupting efforts to "reconstruct" the South and the nation. English 265 will examine key autobiographies and novels by seven black writers as well as two texts by whites, Huckleberry Finn and the blockbuster Hollywood film based on Margaret Mitchell's Gone with the Wind, to explore what was at stake in remembering, repressing, and reconstructing slavery through literature and film in the late nineteenth and early 20th centuries. In this interdisciplinary discussion course, students will critically analyze a variety of texts that explore what it means to grow up Latina/o. The course will situate the Latina/o fiction students will read in the social context from which this fiction emanates. To this end, texts will include theoretical articles, essays, newspaper articles, web pages, poems, memoirs, radio broadcasts, public policy reports, documentaries, short stories, novels, and biographies. The course will begin by focusing on debates surrounding monolingualism, bilingualism, and multilingualism and will explore how these affect Latina/o identity formation. Students subsequently will learn about Latina/o experiences in classroom settings and will critically examine legislative education policies affecting Latinas/os. In the latter half of the course, students will read and discuss Latina coming of age narratives. The course will conclude by analyzing literature that deals with the ways migration affects children.

From Dr. Frankenstein's famous realization that he has indeed created a monster, to the savvy detection work of TV's House, M.D., tales of mysterious patients and canny doctors have captivated audiences for centuries. What do the stories we create--about disability and disease, about who (and what) has the power to heal, about the fear of death and desire for transcendence--tell us about our culture, our history, and the experience of being human? This course will provide an introduction to Medical Humanities, a new area of study that combines methods and topics from literary studies, medicine, cultural studies, and anthropology. We'll read novels, screen films and television episodes, learn about illnesses and treatments, and hear expert speakers as we investigate the close affinities among literary representation, medical science, and clinical practice. We'll play close attention to how ideas about sickness have changed over time and across cultures. Topics will include the doctor-patient relationship, medical detection, the rise of psychiatry, illness and social exclusion, epidemics and the "outbreak narrative," government eugenics programs, and the quest for immortality. Prerequisites: Students must have completed at least one English class above the 200 level. This course welcomes students from all fields--especially humanities majors and those interested in careers in medicine and biology. Class format: There will be two informal, interactive lectures and one discussion section per week. We will

This course explores the history of British and American illustrated books for children by placing "picture book" within the larger publication category of illustrated text. We read illustrated children's texts that have consolidated or transformed the genre. We are especially interested in illustration's interpretive function and its relation to the written. How can illustration shape meaning by bringing out what's implicit in the written text? By ironizing and unsettling those implications? We examine visual images in relation to changing ideas of childhood within various arenas, including philosophy and education, and in terms of various factors, including gender and race. Each week we locate key texts within a context of other illustrated books in relation to a particular period, place, theme, or form. Texts include: Jacques Stella, Les jeux et plaisirs de l'enfance (1657), John Comenius, Orbis Sensualiam Pictus (1658), Aesop's Fables, Nursery Rhymes, and Folk Tales (variously illustrated), The New England Primer, William Roscoe, The

Butterfly's Ball and The Grasshopper's Wife (1802), Anon., The Anti-Slavery Alphabet (Philadelphia, 1847), Lewis Carroll, Alice's Adventures in Wonderland (1865; variously illustrated), R.L. Stevenson, Treasure Island (1883; illustrated by N. C. Wyeth and others) as well as pirate illustrations by Howard Pyle, L. Frank Baum, The Wonderful Wizard of Oz (1900; illustrated by W. W. Denslow), Jessie Fauset and W.E. B. DuBois, eds. The Brownies Book Magazine

English 314 explores internal language change and variation in relation to changing cultural and social contexts and historic events that influenced the English language, particularly in its vocabulary. Included also are the two most important systematic changes in sound (Grimm's Law from the second millennium BCE and the Great Vowel Shift from the late Medieval period) as well as change in major grammatical structures like inflections, the auxiliary verb system, and the formation of negatives and questions. Another important consideration is the rise and fall in the power and prestige of dialects and how a dialect becomes the basis of the standard language. One of the aims of the course is to give students a comfortable familiarity with using dictionaries to extract and interpret several different kinds of information about English. Students learn how to use The American Heritage Dictionary of the English Language for the purpose of tracing current vocabulary to its Proto-Indo-European roots and for understanding when, how, and why English has incorporated cognate forms from other Indo-European languages like Norse, French, and Italian. For the development of English vocabulary since the Old English period, students learn to use the Oxford English Dictionary. The course proceeds chronologically, beginning with the Proto-Indo-European mother tongue and a survey of the major branches that have developed from it. It then examines the linguistic features that all Germanic languages have in common.

In this course we will read a representative cross-section of Chaucer's poetry, focusing on selections from The Canterbury Tales. We will read these works in the original Middle English (and students will be expected to do this using the assigned text). But the emphasis will be "literary," not linguistic, concentrating on Chaucer's narrative and poetic skills and on his unique gifts for satire, understood in his historical, intellectual and literary context. Class attendance is required. Teaching method: lecture and discussion. Requirements: Midterm and final exam; weekly modernization quizzes; one term paper. Required Text: The Canterbury Tales: Fifteen Tales and the General Prologue. 393925870 Ed. Kolve and Olson. 2nd ed. W. W. Norton, 2005.

Shakespeare's Women in Context This course will focus on a set of plays that I haven't taught recently, so if you've taken my Shakespeare lecture course, this will be all new material! Most likely we will read The Taming of the Shrew, All's Well That Ends Well, Cymbeline, Measure for Measure, The Merry Wives of Windsor, Antony and Cleopatra, and As You Like It. We will consider, in particular, the plays' representation of women. What did it mean to be a wife, mother, daughter, sister, widow, maid, whore, nun, virgin, queen, scold, or shrew in this period? To enrich our reading of the plays, we will also examine excerpts from a range of primary texts, which may include pamphlet literature, household manuals, conduct books, homilies, sermons, ballads, and medical writing. These materials will inform and complicate our understanding of gender identity, sexuality, marriage relations, domestic practices, kinship networks, and social hierarchies. Other discussion topics will include female spectatorship, the all male stage, cross-dressing, gendered economics, and how constructions of gender, race, ethnicity, and sexuality interacted in the period.

In Studies in Jane Austen this semester we will read her 6 novels from Sense and Sensibility (1811) through Pride and Prejudice (1814) up to Persuasion (1819). We will also explore the novels' afterlife through the recent and endless array of films, video, and textual continuations and adaptations. For a final project you may elect to write an analysis of one of the novels or films, compose a new chapter for one of her novels, or make a film in imitation of one of her scenes.

Beginning with the colonial period and concluding with the Civil War, this course will examine how a diverse group of writers struggled over the question what exactly it means to be an American and to write an American literature. We'll consider texts considered authoritative at the time (e.g. The Declaration of Independence, Ben Franklin's Autobiography, Harriet Beecher Stowe's Uncle Tom's Cabin) and those that became iconic much later: The Cherokee Memorials, Solomon Northup's Twelve Years a Slave, Walt Whitman's Leaves of Grass. Be prepared to screen films, as well: we'll pair some literary works with cinema adaptations, to consider how the country's defining narratives have been transported--or transformed--in modern times. Class emphasizes analytical skills, close reading, and energetic discussion.

Selected topics or authors in American literature in the twentieth century. Emphases vary according to the instructor. Texts: Morrison, Beloved (ISBN: 0452264464) Faulkner, The Sound and the Fury (ISBN: 079732241) Lauter, Heath Anthology of American Literature, Vol. D and E, 5th ed. (ISBN: 061853300-1, 061853301x)								

Attributes: LA- Literary Arts, NA- North Atlantic World

This course is meant to introduce you to the variety of the American novel, from the late eighteenth through the early twentieth century. Beginning with one of the earliest American novels, Brown's *Wieland* (1798), we will move on to Hawthorne's story of a Transcendentalist utopia *The Blithedale Romance* (1852); Harriet Beecher Stowe's *Uncle Tom's Cabin* (1852), instrumental in galvanizing opposition to slavery; and *Moby-Dick* (1851), Melville's masterpiece. We then will turn to and Elizabeth Stoddard's complex psychological portrait of a young woman in *The Morgesons* (1862) and Harold Frederic's scathing portrait of a fallen minister, *The Damnation of Theron Ware* (1896). We will end with William Faulkner's modernist experiment, *As I Lay Dying* (1930).

This course will examine canonical and non-canonical American novels written in various "popular" genres. Our survey will range from hardboiled detective fiction (Dashiehl Hammett), westerns (Cormac McCarthy), and sci-fi (Ursula Le Guin) to racial passing narratives (Nella Larsen), travel-adventure (Edgar Allan Poe), graphic novels (Frank Miller), and more. In addition to exploring the historical contexts and defining characteristics of these genres, we also will consider the ways in which race, gender, class, and nationality inform both past and present conceptions of the "popular." Lecture and discussion. Two papers, occasional quizzes, final exam. Texts may include: Crane, *The Red Badge of Courage* (1895) Poe, *The Narrative of Arthur Gordon Pym of Nantucket* (1838) Hammett, *The Maltese Falcon* (1929) Larsen, *Passing* (1929) Le Guin, *The Lathe of Heaven* (1968) Miller, *Batman: Year One* (1987) McCarthy, *All the Pretty Horses* (1992) Diaz, *The Brief Wondrous Life of Oscar Wao* (2007) Morrison, *Home* (2012)

This course will explore the development of traditions in American poetry by concentrating on groundbreaking books that changed the literary landscape. While we'll pay close attention to how to read poems, and learn about various aesthetic movements, we'll also explore poets' engagements with historical events and processes (wars, struggles for social and political equality, modernization). The course seeks to broaden understanding of poetry's historical and cultural role; to develop close reading skills that are crucial for interpreting and appreciating poetry; and to strengthen critical writing and thinking skills. No special background in poetry is required, just an interest to learn. Writers include Edgar Allan Poe, Emily Dickinson, Walt Whitman, Stephen Crane, Robert Frost, William Carlos Williams, Langston Hughes, Elizabeth Bishop, and Robert Lowell.

This class will focus on British literature and arts of the twentieth century by exploring responses to and reflections upon the impact of World War I. We will read the soldier poets (Sassoon, Graves, and Owen), along with novels by Virginia Woolf, Sebastian Barry, Rebecca West, and Pat Barker that consider the war and its aftermath. We will also examine work in the visual arts and in music that respond to the war. Students will be required to attend selected performances and lectures on campus that are part of the campus-wide series of vents marking the 100th anniversary of the War. There will be a mixture of short response papers, in-class presentations, and a longer research paper for the class's basic requirements.

This course examines Asian American women's writing by focusing on multiple genres, including novels, short stories, essays, poetry, and film. Asian American women have been award winning journalists, best-selling authors, Pulitzer Prize winning writers, and, most importantly, everyday women who have

written for their eyes only. Asian American women's writing has focused on subjects such as war, the inequity of discrimination, American history, the strength of men, and the political importance of feminist activism. We will read a variety of women's writings and will examine themes of gender, race, and sexuality, among others.

In this course, we will read some of the ground-breaking and enduring works that have shaped the field of contemporary Feminist Theory, especially in literary studies. What ideas fuelled the stunning emergence of this field of inquiry some forty years ago, what questions and problems remain most persistent, and what pressing concerns today are shaping up to be the most crucial as feminist theory continues to permeate academic study? Our critical readings will pair theoretical essays (available on line) with books of women's poetry, including Joy Harjo's In Mad Love and War, Mary Oliver's Dream Work, Margaret Randall's The Rhizome as a Field of Broken Bones, Natasha Trethewey's Native Guard, and the collection Women's Poetry from Antiquity to Now. This course is cross-listed with WMST 363

English 368 is a survey of writers and cultural and literary traditions from 1930 to 1970. Our work in this class will focus on three traditions of African American writing from this period: realism, modernism, and the Black Arts Era. Writers and texts may include: Zora Neale Hurston, Langston Hughes, Ralph Ellison, Richard Wright, Lucille Clifton, and Gwendolyn Brooks. Close readings and analysis will provide our methodological focus. Lectures, documentary films, and class discussions will figure prominently.

This interdisciplinary course will explore how issues of health, medicine, and illness are impacted by questions of race in 20th century American literature and popular culture. The goal of the course is to offer students tools to analyze literature as well as to provide them with the tools to think critically about pressing social issues. Students will also gain a vocabulary and develop skills for working across disciplines. Specific areas covered will include suffering & pain, death, the family and society, reproduction, mental illness, aging, human subject experimentation, the doctor-patient relationship, and humor in medicine. In exploring the topics, we will pay particular interest to questions of race and ethnicity, and we will concern ourselves primarily, but not exclusively, with African American and Latino writings. We will also pay close attention to how questions of gender and sexuality emerge prominently in the intersection of race, health, and art. In the process, students will have the opportunity to develop independent research projects that seek to bring together these distinct fields. GerShun Avilez is an Assistant Professor of English. He received his Ph.D. in English from the University of Pennsylvania, where he also earned a Graduate Certificate in Africana Studies. He is a cultural studies scholar who specializes in contemporary American & African American literature and visual culture. Throughout his work and teaching, he is committed to studying a wide variety of art forms, including, drama, Honors Carolina students register online when their registration appointment begins. Other students register online beginning November 17. Enrollment capacity increases on Nov 4 (6), Nov 6 (12), Nov 10 (18), and Nov 12 (24).

English 373 introduces you to the literature of the American South, moving chronologically from the pre-colonial period to the twenty-first century. We will address the following tasks, all tightly interrelated: * Examine how southern literature has both reflected and shaped southern culture over the years (and whose southern culture?) * Explore the myths of the South that its literature has created, championed, challenged, and debunked * Examine issues of race, class, and gender within the literature * Observe the changing narratives created about southern literature during the years * Explore the ongoing question: "What is southern literature and why do we study it?" * Explore the evolving concept of "The Global South" The format of the class will be some lecture, small group work, large group discussion, and presentations. Written work will include short assignments and a major paper.

Course Description: Words and pictures. Those different ways of framing expression often come together in works addressed to children--so much so that, though illustrated books have a long history that assumes adult readership, nowadays we have come to associate "picture books" mainly with children. In the same way, works produced by children--including many children who went on to become famous adult writers or artists--often take shape through words and pictures together. In this course, our focus will be the convergence of words and pictures as they define children and childhood. Do understandings of childhood change when depicted in different ways--when different kinds of visual forms (drawings or photographs) illustrate different kinds of written texts (poems or stories)? When depicted by children or by adults? Our approach will employ careful reading of formal conventions--for example, what different conventions shape photographs and drawings? It will also stress specific investigation of social and historical context--in what particular circumstances were these works produced: when? Where? Given what economic means? By whom exactly were they produced--what age? What gender? What race?--what else?--might their authors or artists be? Seminar method: Daily reading and full class discussion. In-class digital and actual presentation of works under discussion. Extensive hands-on work. Research conducted under the professor's and (when available) Graduate Research Consultant's individual supervision and also in the

The Civil Rights Movement of the 1950s and 1960s has assumed a central place in American historical memory and, over the past half century, has motivated and inspired writers from across the country and the world. This course will focus on the poetry, fiction, memoirs, drama, and songs written in response to the terrors and triumphs of this tumultuous era and African Americans' struggles for citizenship, equality, and social justice. From James Baldwin to Eudora Welty, Langston Hughes to Lucille Clifton, Anne Moody to Alice Walker, Nina Simone and Bob Dylan to Dalek, these authors and singer-songwriters have woven a fabric of collective memory that points to our nation's ongoing civil rights struggles.

This course will examine literary texts and films from around the world dealing with human relationships to nonhuman animals and the environment. Paying special attention to the ways in which social differences such as nationality, race, religion, class, and gender articulate ecological relationships, we will explore a number of specialized themes: the social meanings of 'nature', the body, and the environment; representations of climate change and other ecological disasters; problems of resource scarcity; the relationship of capitalism to environmental change; indigenous environmental struggles; and the possibilities of building environmental ethics across borders. Readings may include: Jamaica Kincaid, A Small Place Amitav Ghosh, The Hungry Tide J.M. Coetzee, The Lives of Animals Shani Mootoo, Cereus Blooms at Night Indra Sinha, Animal's People Karen Tei Yamashita, Through the Arc of the Rainforest Margaret Atwood, Oryx and Crake

A study of rhetorical theories and practices from ancient to modern times. Emphasis will be on translating theories into teaching practices used in high school and college writing courses, including the UNC Writing Program. The course examines strategies for planning, drafting, and revising; for developing writing assignments; and for evaluating writing. Major assignments will include a course design portfolio, including assignments, course policies, lesson

plans, and assessment materials.

This course explores novels and short stories by Latina/o writers that focus in one way or another on photographs & photography that simultaneously question (or "queer") certain cultural givens about gender, sexuality, race/ethnicity/nationality, class, and other coordinates of identity and subjectivity. We will inquire into the connections between this double focus. At the same time we will examine actual photo-based visual work by Latina/o artists. Textual and visual works considered include those by Alma López, Laura Aguilar, Axel Damian Reyes, Gerardo Suter, Franc Franca, Roberto Rincón, John Rechy, Achy Obejas, Helena María Viramontes, Emma Pérez, Elias Miguel Muñoz, Félix González-Torres, Graciela Limón, and Carla Trujillo. This course is cross-listed with WMST 666.

Course Description: The poets traditionally associated with British Romanticism--Blake, Wordsworth, Coleridge, Byron, Shelley, and Keats--distanced themselves, often vehemently, from their contemporaries. Participants in this seminar will revisit the otherings created by Romanticism's signature authors and by their subsequent readers. We will examine these Romantic poets in conversation with Romanticism's "others," such as Romantic-period "poetesses," pre-Romanticism, the Gothic, the historical novel, the novel of manners, and social, political, and religious conservatism. Further, we will reflect on the intellectual stakes involved in characterizing Romanticism as, say, secular, revolutionary, and/or individualistic. The instructor warmly welcomes students specializing in any period of any national literature. Interested students are invited contact the instructor in advance with any concerns or questions. Registered students are asked to notify the instructor of particular interests so that she may finalize the reading schedule well in advance. Assignments: Annotated bibliography, 20 pages, on an author or other topic (e.g., Romantic-period theater). Two 15-minute talks to the class summarizing a scholarly article or chapter (which may be from bibliography) Lesson plan for one 50-minute undergraduate class on a Romantic-period text, workshopped with seminar participants. Primary Texts will be drawn from the following, depending on students' interests: Austen, Sense and Sensibility, Norton Critical Edition, ed.

This seminar takes the nervous body as key figure for thinking about the United States's uneven journey into modernity following the Civil War. We will read works of narrative fiction and pay close attention to literary form, especially experiments with point of view, depictions of consciousness, and renderings of mood, affect, memory, and sensation. With an eye to discerning the forms of selfhood that emerge in the late nineteenth-century, we will trace developments in medicine, evolutionary biology, psychology and philosophy. Students will present research on nineteenth-century cultural innovations, such as the rise of the railroad and telegraph, the time management studies of Frederick Taylor, and the medical theories of Victorian "sexologists." By studying literary forms, cultural narratives, and historical materials, we'll seek to recover pre-Freudian conceptions of the neurological body and to consider new avenues for a 21st-century literary criticism that incorporate knowledge drawn from such fields as cognitive psychology and neuroscience. Literary works will include the following: * Kate Chopin, The Awakening and "The Storm" * Charles Chesnutt, The Marrow of Tradition and "The Passing of Grandison" * Stephen Crane, The Red Badge of Courage * Harold Frederick, The Damnation of Theron Ware * Charlotte Perkins Gilman, "The Yellow Wallpaper" and Herland * Oliver Wendell Holmes, Elsie Venner: A Romance of Destiny * Pauline Hopkins, Of One Blood: or, The Hidden Self * Henry James, Daisy Miller * Frank Norris,

REALISM AND SOUND "Modern realism begins from the position that truth can be discovered by the individual through his senses" (12). So argued Ian Watt in his seminal 1957 The Rise of the Novel. In this seminar, we will consider this question in the context of a recent turn in literary scholarship to sound studies. Attending particularly to the role played by hearing in realism, we will seek to understand with some specificity just what music might have to do with creating the perception that we are experiencing reality when we read a novel. In our readings of mid-twentieth-century American novels in which music (rock and roll, blues, the ballad) is featured as crucial, we will contemplate relevant work in philosophy, novel theory, and media studies--with detours into cognitive science and affect theory--to consider two related questions: to what extent can reading be described as a bodily, hence "affective," experience? To what extent did the introduction of sound technologies interrupt or enhance the work of realist novelists at that historical moment?

Prerequisites: *First-year students only. Registration Procedures: *Students who are not enrolled in a fall 2014 FYS register online when their registration appointment begins. *Other students register online beginning Nov 17. ABOUT THE SEMINAR: The basic question examined in this seminar will be the costs and benefits of the U.S policy of drug prohibition. Does drug prohibition decrease drug abuse? Affect violence in our society? Aid terrorism? Diminish our civil liberties? Affect the public's health? Corrupt public officials? Should drugs be decriminalized or legalized and if so, how? Should different illicit drugs be treated differently? What is the evidence in the United States and in other countries on decriminalization or legalization? Students will write a paper and present it in class, and prepare an interview with individuals who are on the frontline of the drug war, such as police or attorneys. As a seminar, classroom activity will consist of discussions and debates. ABOUT THE INSTRUCTOR: Arthur Benavie received his Ph.D. in economics from the University of Michigan. He has been at UNC since 1967. His specialty is macroeconomic theory and policy. His book, Deficit Hysteria: A Common Sense Look at America's Rush to Balance the Budget, was written for the general public. His most recent book is Social Security under the Gun. In his former life he was a concert violinist, and playing violin is now his main avocation.

Build-Measure-Learn: Constructing Your Own Start-Up. This class will combine some basic principles of entrepreneurship with the newly emerging lean startup methodology. Students will be given background on entrepreneurial thinking and a hands-on workshop involving the latest thinking in executing a successful new venture. They will then be provided with a small grant to execute their idea over the course of the semester. They will interact intensively with the instructor, outside advisors, and guest speakers, and it is hoped that some or all of the projects will become viable by the end of the course. FIRST YEAR STUDENTS ONLY. Buck Goldstein is the University Entrepreneur in Residence and a Senior Lecturer in the Department of Economics. Prior to returning to the University, Goldstein co-founded Information America, an online information company which was publicly traded and subsequently acquired by the Thomson Corporation. Subsequently, he was a partner in Mellon Ventures, the venture capital arm of Mellon Bank. He is the author, with Holden Thorp, of Engines of Innovation--The Entrepreneurial University in the 21st Century. Honors Carolina students register online when their registration appointment begins. Other students register online beginning November 17.

Introduction to fundamental issues in economics including competition, scarcity, opportunity cost, resource allocation, unemployment, inflation, and the determination of prices. Prior to joining the Department of Economics as a lecturer in 2006, Rita Balaban taught at the College of Charleston and Samford University. She has directed over 20 undergraduate research projects in various areas of economics that include the music and radio industries, international trade, and the economics of sports. She also enjoys doing volunteer work with students in the community. Honors Carolina students register online when their registration appointment begins. Other students register online beginning November 17. Enrollment capacity increases on Nov 4 (6), Nov 6 (12), Nov 10 (18), and Nov 12 (24).

The primary focus of the course is on the function of markets and how markets work to allocate resources and distribute income. Topics included in the course are supply and demand, consumer behavior, theory of the firm, market structure, and welfare economics. One of the purposes of the course is to help students learn how to apply microeconomic principles to economic questions. For this reason, problem sets are assigned and considered to be an important part of the course. The honors section is offered in order to provide students with the opportunity to gain a somewhat greater breadth and depth of knowledge than in other sections. Calculus will be used. PREREQUISITES: ECON 101 AND (MATH 152, 231 OR STOR 112, 113). Professor Sheran-Andrews is an experienced teacher and researcher in microeconomics, economic statistics and labor economics. Her early research focused on public programs for needy families and on women's joint career and family decisions. In recent years, she has been particularly interested in the role assessment in the learning process and as a means of integrating core content across the curriculum, and she has presented her work at conferences in Wilmington and Greensboro. Honors Carolina students register online when their registration appointment begins. Other students register online beginning November 17. Enrollment capacity increases on Nov 4 (6), Nov 6 (12), Nov 10 (18), and Nov 12 (24).

The honors section of ECON 570 explores some of our statistical concepts more deeply and apply them to more challenging problems. Creativity and critical thinking are necessary when deciding how to model and interpret statistics. The honors section is ideal for students preparing to write senior theses or preparing for postgraduate studies. A major portion of the course is an empirical research project. Students are expected to formulate their own research question; transform it into a hypothesis that can be tested statistically; collect, clean, and categorize data; perform econometric analysis to test the hypothesis; and make inferences and draw conclusions from their results. PREREQUISITES: ECON 101, ECON 400, AND CALCULUS (MATH 231 OR STOR 113 RECOMMENDED). FAMILIARITY WITH INTERMEDIATE MICROECONOMICS (ECON 410), LINEAR ALGEBRA (MATH 547 OR 577), AND STATA SOFTWARE IS DESIRABLE, BUT NOT NECESSARY. Stephen Lich-Tyler's primary interests are applied microeconomics, household and family economics, intertemporal behavior, and labor economics. He is currently studying how people learn about the long-term suitability of potential mates in the marriage market, issues of commitment and specialization in joint household decision-making, and how to recover individual preferences from household demands. Stephen is originally from Texas, where he did his undergraduate and graduate studies. After that, he held positions at the University of Michigan, Copenhagen University the Instituto Honors Carolina students register online when their registration appointment begins. Other students register online beginning November 17. Enrollment capacity increases on Nov 4 (6), Nov 6 (12), Nov 10 (18), and Nov 12 (24).

Worldwide, more land is used for food production than any other land use. Because of this, what happens on farms has far reaching impacts on the rest of the earth's systems; particularly as the world's human population will soon surpass 7 billion people and continues to grow. Additionally, the area needed to feed the planet can only increase when food competes with fuel and medicine production for land. Figuring out how to feed the planet in a sustainable way has thus become a critical question for our future. The Green Revolution and industrial agriculture have allowed us to increase agriculture production and feed the world during the 20th century, yet these technologies depend upon limited freshwater and energy resources to boost production. At the same time, pollution concerns related to industrial agriculture; from pesticides to fertilizer runoff, the worldwide collapse and loss of pollinator species, the loss of wild seed stock and genetic drift in seed banks , are of increasing concern. A second Green Revolution is now being proposed, based on genetically engineered crops. It is worthwhile to examine the world food system for its current level of sustainability and what the future might hold. This course attempts to investigate this question. Using resources from a variety of media and experiences (film, news, academic literature, field trips) and a variety of different disciplines, students will learn about the state of agriculture, the environment and global food production issues as well as critically. Honors Carolina students register online when their registration appointment begins. Other students register online beginning November 17. Enrollment capacity increases on Nov 4 (6), Nov 6 (12), Nov 10 (18), and Nov 12 (24).

This course is going to look at the disruptive technologies that are rapidly changing the business of energy around the world. Here are some of the main topics we will cover:

-Energy storage	-Regulatory and policy changes: A look at the evolving landscape in the US	-The future of utilities and changing business models
-Protecting the grid from physical disturbances	-New technologies for managing the grid	-Economic costs and benefits
-Policies being utilized to incentivize efficiency	-Energy Efficiency	

2. Energy efficiency
3. The rise of Smart Cities
4. Renewable Energy Technologies
5. The link between clean technology and economic development and job creation

The Clean Tech Summit will also be an important part of the class (<http://ie.unc.edu/cleantech/>). It will not only give students the opportunity to network with key regional people in industry, finance and policy but also allow them to participate with high level players in discussions on the future of energy. This event will also give students a great opportunity to distribute their resumes and look for summer internships. PERMISSION REQUIRED.

The University has set a goal of offsetting its coal fuel with fuels with no or less GHG content. Several options have been considered but no viable and sustainable source of combustible materials has been identified. This Capstone will review those options in this current environment and quantify potential sources. Further, the project will review purchases of fossil content materials purchased through the University's endowment. An evaluation of optional materials sans fossil fuels will be conducted as well as an impact assessment of switching to more sustainable products.

Northbound and Southbound Chapel Hill Transit buses use this intersection to change drivers, exchange data with dispatchers and idle to adjust their schedule. Proposed for a Capstone experience is to time the idle time of these buses and to measure the CO2, particulate and NOx emissions at this intersection on days the University is in session and one or two weekdays when it is not. What is the emission contribution attributed to the idle periods? What would be the impact in terms of engine function and passenger comfort, winter and summer, if the buses simply shut down? Potential clients include the University, the City of Chapel Hill, EPA and the bus company, each of whom have an interest in bus operation and a clean environment.

Prerequisites: *First-year students only. Registration Procedures: *Students who are not enrolled in a fall 2014 FYS register online when their registration appointment begins. *Other students register online beginning Nov 17. ABOUT THE SEMINAR: Globalization is a word we hear every day, but what does it mean for us in local places? Specifically, what can an understanding of globalization tell us about Carolina and nearby places? This seminar weaves together perspectives on globalization with hands-on exploration of Carolina and its place in today's global knowledge economy, and the University's founding in relation to the globalizing forces of that day. Our focus will shift back and forth between the global and the local, even to the microscale of our campus. We will learn through a variety of experiences and approaches, including fieldwork, old documents, and some introductory GIS (geographic information systems) exercises in addition to readings, class discussion, and group work. By the end of the seminar, students will not only have an understanding of globalization and the very real connections between the global and the local, but also a unique perspective on our university. ABOUT THE INSTRUCTOR: John Pickles is an economic geographer trained in political economy and development studies, cultural and social theory, and continental philosophy. His research currently focuses on global production networks, European economic and social spaces particularly post-socialist transformations

Foot note:								Special Grading:GR1
Attributes: PL- Physical and Life Science								
Reserve Capacity:		17-OCT-2014 RC CLAS UG FFYS STDTS		Reserve Enrl Cap: 24		Reserve Enrl Tot: 0		
<p>Prerequisites: *First-year students only. Registration Procedures: *Students who are not enrolled in a fall 2014 FYS register online when their registration appointment begins. *Other students register online beginning Nov 17. ABOUT THE SEMINAR: The seminar first describes today's fundamental sources of energy: oil, natural gas and coal, how and where to find them, and the latest statistics on how long the present reserves will last. We will then explore alternative energy resources and why it is so important for society to understand that fossil fuel reserves are finite, and will be depleted in 40 years (cheap oil) or in 200 years (coal). The course stimulates student participation through class debates (e.g., Can nuclear energy become a viable and safe substitute for coal?, Is the current US energy policy a threat to national security?). ABOUT THE INSTRUCTOR: José Rial has a Ph.D. in Geophysics from Cal Tech and a MSc. in Geology from the University of Michigan. Rial's expertise includes mathematical modeling of natural systems, seismic wave propagation and climatology. In recent years Rial's academic interests include the role of science and scientific discovery on global environmental issues, such as global warming, climate change and policy.</p>

Though scholars have long disagreed about the causes of the Cold War, no one disputes that the ¿German question¿ played a central role in the break-up of the wartime alliance and the political division of western and eastern Europe that lasted for almost half a century. But was this division of Germany inevitable, and if so, why? If not, how did it happen? Was the Cold War inevitable? If yes, why? If not, why not? The course will explore these questions in two main chronological contexts ¿ 1945 to 1949 and 1989 to the present. Against the backdrop of the division of Germany, having put ourselves in a position to ask probing questions about patterns of Soviet conduct in the early cold war then, we will fast-forward to the present ¿ the daily impressions of unfolding events involving Russia today, right up to and including Russian intervention in Georgia, the Russian public rationale for the invasion, and the

broad scope of Putin's efforts; in the Ukraine. We will then undertake to place aspects of early cold war issues in the context of emerging Russian conduct now. We will talk about the nature of this behavior in relation to patterns of western outlooks and actions then and now; looking at how historians are assessing and reassessing Soviet policy to this day; considering interpretations of Russia's path in the twenty-first century; and pondering the possibility of a new, perhaps inevitable conflict with a 'new' or perhaps, after all, 'old' - Russia. This course was funded by the Honors Course Honors Carolina students register online when their registration appointment begins. Other students register online beginning November 17. Enrollment capacity increases on Nov 4 (6), Nov 6 (12), Nov 10 (18), and Nov 12 (24).

This is a temporary section. If you wish to do an honors thesis in German, you may temporarily enroll in this section until you work out the details with your professor and receive written approval from the Director of Undergraduate Studies for GSLL, Dr Jonathan Hess. Once the approval form has been properly signed, your registration will be changed and you will be enrolled in a section of this course that is associated with the name of the professor you are working with. You will not be fully enrolled in Honors Thesis work in GSLL until this process is complete.

This is a temporary section. If you wish to do independent study work in Russian, you may temporarily enroll in this section until you work out the details with your professor and receive written approval from the Director of Undergraduate Studies for GSLL, Dr Jonathan Hess. Once the approval form has been properly signed, your registration will be changed and you will be enrolled in a section of this course that is associated with the name of the professor you are working with. You will not be fully enrolled in Independent Study work in GSLL until this process is complete.

--------------------------	-------------	-----------------	-------	-----------------------------	----------------------------

Prerequisites: *First-year students only. Registration Procedures: *Students who are not enrolled in a fall 2014 FYS register online when their registration appointment begins. *Other students register online beginning Nov 17. ABOUT THE SEMINAR: This seminar examines two key themes in modern cultural and intellectual history: the importance of travel in the lives and cultural identities of American writers and the important role of European cities in the evolution of modern American cultural identities. We shall focus on a historical era in which American writers were especially drawn to Europe as an alternative to the social and cultural life in the United States; and we'll discuss how the encounter with Europe influenced these writers as they defined their national identities as well as their views of politics, social relations, gender identities, literature, art, and Western cultural traditions. The seminar is based on the assumption that travel has become one of the most influential personal experiences in modern times. In short, we shall explore the connection between travel, writing, and personal identities. This is a class for people who like to read about personal experiences and are intrigued by foreign travel. The assigned texts include works by women and men such as Margaret Fuller, Mark Twain, Henry James, Edith Wharton, Gertrude Stein, and Ernest Hemingway; and the cities we'll discuss include Paris, London, Rome, Venice, and Athens. ABOUT THE INSTRUCTOR: Lloyd Kramer's interests

Prerequisites: *First-year students only. Registration Procedures: *Students who are not enrolled in a fall 2014 FYS register online when their registration appointment begins. *Other students register online beginning Nov 17. ABOUT THE SEMINAR: History teachers often assign novels that capture the essence of the era. When they show movies, however, they tend to prefer filmic recreations on an historical event, and class discussion centers around accuracy and objectivity. This course takes a different approach, and treats films as primary sources for studying the historical context in which they were made. Beginning with the development of narrative film in 1908, it will trace change by looking sequentially at those nationally specific genres that had repercussions beyond national borders. The primary historical themes will be the repercussions of two world wars in the United States and its European allies and enemies. Both wars played a pivotal role in the critique liberal democracies that consistently proved unable to fulfill their utopian aspirations, as analyzed so perceptively in the assigned book by Mark Mazower. The rise of socialism, which includes National Socialism, as an alternative to liberalism also played itself out on the Silver Screen. A course such as this is especially important in our age of mass media, when people must be familiar with film as well as literature to be considered culturally literate. One cannot become learned, however, simply by viewing these films. Critics

<p>Prerequisites: *First-year students only. Registration Procedures: *Students who are not enrolled in a fall 2014 FYS register online when their registration appointment begins. *Other students register online beginning Nov 17. ABOUT THE SEMINAR: This course will explore diverse experiences of modernity among Jewish populations from the mid-eighteenth century to the contemporary period. Drawing on memoirs, diaries, film and literature, we will trace transformations and continuities in Jewish life and identities under the influence of political, cultural and socioeconomic changes in surrounding societies. Through our study of Jewish communities in Western, Central and Eastern Europe; the Ottoman Empire; North Africa; Israel; and the United States we will challenge portrayals of a monolithic experience of the Jewish encounter with modernity across geographic borders. Lectures, readings and class discussions will focus on Jewish intellectual and political developments as well as religious, cultural and social history, including emancipation, family life, education, childhood, gender, relations between Jews and non-Jews, the Holocaust and Jewish life after the Second World War. Discussions will challenge students to develop their own analyses while becoming familiar with a range of arguments among scholars of Jewish life. Assignments will include research in local archives related to Jewish history in Durham, Chapel Hill and elsewhere. ABOUT THE INSTRUCTOR: Karen Auerbach is an Assistant Professor</p>

Contemporary France has been shaped by three events: (1) the defeat in 1940 and the occupation of France by Germany until 1944, in collaboration with the Vichy regime and opposed by diverse resistance movements; (2) the war in Algeria against independence fighters and to protect the territorial integrity of France; and (3) the political, cultural and social movements born of the {thirty glorious} years of postwar economic expansion which marked all facets of French life in the late 1960s and 1970s. In the class, we will examine these events, the way they are remembered and given meaning in France, and how they made the France we know today. Donald Reid is an historian of modern Europe with a particular interest in how individuals and societies deal with traumatic pasts and in the place of history in novels and films. His research has ranged from the social worlds of Paris sewer men and French fascination with them to the way the Resistance has been remembered in France. His most recent publications are on radical politics in modern France and the detective novelist Didier Daeninckx as historian.

Honors Carolina students register online when their registration appointment begins. Other students register online beginning November 17. Enrollment capacity increases on Nov 4 (6), Nov 6 (12), Nov 10 (18), and Nov 12 (24).

In this seminar, eight distinguished speakers from a wide variety of disciplines will address how food production and consumption shape the way we live and how we imagine those lives. Our perspectives will include the science of nutrition, the politics of regulation and distribution, the ceremonial significance of food in our daily practices and the representation of food in film and literature. In addition to professors from these disciplines, we will also turn to others in the Triangle who have played a role in such issues as the local food movement. HONORS CAROLINA STUDENTS WITH 60+ CREDIT HOURS ONLY. COURSE MAY BE TAKEN ONLY TWICE FOR PROGRAM CREDIT. 1.0 HOUR OF PASS/FAIL CREDIT. Associate Professor of English and Comparative Literature, Ritchie Kendall joined the UNC faculty in 1980. He holds a BA in English from Yale University (1973) and an MA and PhD in English from Harvard University (1980). His specialty is in English Renaissance drama with an emphasis on the socio-economic dimensions of early modern theater. He has taught Honors courses in Shakespeare, Elizabethan and Jacobean drama, comedy and social class, epic and drama, and early modern ideas of entrepreneurship.

"Take a cooking class in college and get credit? Sign me up!" Thus often begins a 5 minute- to 2 hour conversation on Honors 352-001, When we first offered the class in 1997, it was a slightly naïve and timid enquiry into food and culture. Since 9/11/2001 and the economic meltdown in 2008, developing and sustaining a vital interest in the sourcing, preparation, consumption, and preservation of our daily bread has become an urgent concern for us. If one cannot eat sustainably there is no point in worrying about finance. Malthus will be proven correct. Spring 2015 continues our traditional sweep from medieval antecedents of eating disorders as well as large-scale agriculture to concerns with nutrition, epidemiology, biochemistry, and evolutionary biology. We examine such topics as the ethics of raising food crops for fuel, slow vs. industrial food, organic, and local food sourcing as well as the grim reapers of climate driven crop and water shortages and rampant obesity with its implication for escalating mortality from Type II diabetes and other diseases. American Wasteland, Four Fish, Just Food and The American Way of Eating highlight food entitlement and its consequences. As traditional communal meals are changing, the newfound passion for sustainability is on the ascendant. For some, however, sustainability has always been a way of life and to understand this and to help implement it more widely is our concern. Thus we deliberately do not engage extreme positions which do more to obscure than to

Every city, historians often claim, has a personality of its own. Now the capital of the Czech Republic, it is easy to see Prague as a Czech city that exudes a peculiarly Czech history and culture. Still others have envisioned a timeless ,magic Prague, full of mystery and improbable legends;a vision of the city's past and present that informs many tourist brochures today. Our course will challenge these characterizations as we explore the Prague's history from the medieval era to the present day. Along the way we will chart out our own biography of the city and explore the various ways in which scholars write urban history. We will learn how art and architecture can provide a window on past cultures; how large historical forces such as nationalism and industrialization take form in the city; what public monuments can tell us about memory construction in the city; and how outsiders construct images of the city and its people. Our readings will include secondary sources as well as a number of primary documents that will allow us to interpret Prague's history for ourselves. 3.0 CREDIT HOUR COURSE; FULFILLS HS-HISTORICAL ANALYSIS REQUIREMENT. Chad Bryant studies the social and cultural history of Central and Eastern Europe from the eighteenth century to the present. His research focuses on the Bohemian Lands, most of which now constitute the Czech Republic. His first book, Prague in Black: Nazi Rule and Czech Nationalism (Harvard University Press, 2007), examined the ways in which Nazi rule radically transformed

Attributes: PH- Philosophical and Moral Reasoning							

This course deals with the theme of the transition from ancient to modern understanding of the essence of politics and will concentrate on selected plays of Shakespeare that profoundly dramatize that transformation (among them, Henry IV-Part I, Julius Caesar, King Lear, The Tempest). As the primary representatives of ancient thought, we shall read large portions of Aristotle's Nicomachean Ethics and Poetics. As the signal work in initiating modern

thought, we shall read Machiavelli's Prince. This seminar will be conducted solely through conversation. Several essays, of varying length, will be required. There will also be an oral final examination. Students at all levels are welcome, and there are no prerequisites other than a willingness to read carefully and diligently. INSTRUCTOR CONSENT REQUIRED. EMAIL DR. GOLDBERG AT legoldbe@email.unc.edu). 3.0 CREDIT HOUR COURSE; FULFILLS PH-PHILOSOPHICAL & MORAL REASONING REQUIREMENT. My first loves are Shakespeare and Plato (my advanced degrees are in Classical Greek, Literary Criticism and English Literature). For the last twenty years, however, I have primarily taught a sequence entitled ¿Elements of Politics¿ in which we discuss classics of political thought from all genres¿philosophy, literature, history, essay, economics and science--, ranging from the ancients through the twentieth century. This has been the main focus of my care and attention. In their proper place, Plato and Shakespeare come in for a considerable amount

Program: Honors Semester in London Title: Imagining Literary London This course traces the evolution of `imagined¿ London as the setting and inspiration for literary works, from the mid-nineteenth century to the present. A key theme is the way in which London writers have responded to periods of extreme violence. We will consider, for example, Dickens¿s articulation of the French Revolution, Modernist expressions of the horrors of the First World War, and how London writers past and present have represented the rise of European fascism and the subsequent terror of the Blitz. Students will explore the city in ways complementary to course material, while being introduced to important concepts in urban literary studies.

Program: Honors Semester in London Title: The London Art World This course examines some of the dazzling array of art on view in London's museums and public galleries, its smaller art centers, commercial galleries and auction houses, and in public spaces. It is possible to see both historic and contemporary art from round the world in London, this most diverse of world capitals, and we will be exploring famous galleries such as the National Gallery and Tate Modern, as well as going to a variety of different London neighborhoods. Our focus is two-fold: both on the diversity of art on display, and on the nature of contemporary art displays. By the end of the course, you will be confident about looking at previously unfamiliar art works and discussing them, both verbally in the group and in the journal that is a major component of the course grade. You will be familiar with a range of art terms, will be able to analyze the labels, wall panels and leaflets that accompany art displays, and will have a good sense of what there is to see in London and how best to understand it.

Injury, disease, and bodily decay predate modern medicine and have interested individuals other than medical doctors for centuries. This course deals with how knowledge about disease has been produced, and how it has evolved and changed us as it circulates worldwide. We will discuss the origins and evolution of major medical theories (e.g. humors, germs) and forms of intervention (e.g. vaccination, birth control) in relation to their socio-historical context

(e.g. colonialism, the Cold War). Along the way, students will be exposed to the wide array of groups and individuals who have played a role in our contemporary knowledge of illness, including unlicensed practitioners, the military, priests and nuns, device manufacturers, and the sick themselves. Our two main goals will be to understand (1) the ways in which Western medicine has become a global political and cultural phenomenon; and (2) how different social actors have parsed the distinction between sickness and health over time. Focusing on the sick and the ways they have confronted disease, bodily decay, and physical discomfort enriches our understanding of the specificity of modern medicine, and helps explain why modern medicine co-exists with other forms of behaviors to care for oneself and others, including diet, alternative medicine, and prayer. At the same time, it is undeniable that modern Western medicine has become a singularly powerful way to view and act on illness. The distinctive strengths and weaknesses of Western medicine have not emerged in a

Prerequisites: *First-year students only. Registration Procedures: *Students who are not enrolled in a fall 2014 FYS register online when their registration appointment begins. *Other students register online beginning Nov 17. ABOUT THE SEMINAR: We live in a society constantly bombarded by images, statistics, and warnings about dangers to our health, safety, and well-being. In this course we ask: How do we decide what is a risk, and what isn't? What influences this process? How do our perceptions of, assumptions about, and measurements of risk drive the questions we ask in all of the roles we play in our everyday lives (as students, as consumers, as communicators)? ABOUT THE INSTRUCTOR: This course will be co-taught by Royster fellows Kashika Sahay, Maya Nadimpalli, and Sarah George. Kashika is a second year doctoral student in Maternal & Child Health with a background in epidemiology. Kashika's module focuses on calculating and interpreting public health risks. Maya is a final year doctoral student in Environmental Sciences & Engineering with interests in emerging disease and science communication. Maya's module explores the influence of science on risk perception. Sarah is a second year doctoral student in English with an emphasis on the intersections of literature and law. Sarah's module examines the paths by which public perceptions of risk infiltrate our popular culture.

ABOUT THE SEMINAR: LTAM 89 will explore multiple facets of the Cuban revolution and its impact in Latin America and the United States. Under the auspices of la revolución, Cubans embarked upon one of the most ambitious revolutionary projects of the twentieth century. Virtually all previously existing national institutions were abolished, modified, or otherwise adjusted: the service of an egalitarian project inscribed into the claim of national sovereignty and self-determination. But the impact of the Cuban revolution reached far beyond the island. The experience of a Third World country seeking to transform a social system, which required at the same time the need to eliminate the privileged presence of the United States, resonated in Latin America. Cuban policies; the very ¿model¿ of Cuba; posed a direct challenge to U.S. interests in the Western Hemisphere, a challenge that assumed particular urgency; at the height of the Cold War; when the Cuban leadership proclaimed the Marxist-Leninist nature of the revolution and allied itself with the Soviet Union. The example of Cuba and the ¿romance¿ of revolution as a means of social change resonated in Latin America. The Cuban revolution also posed a challenge to the status quo in Latin America, and appeared to offer a way to</p>

Prerequisites: *First-year students only. Registration Procedures: *Students who are not enrolled in a fall 2014 FYS register online when their registration appointment begins. *Other students register online beginning Nov 17. ABOUT THE SEMINAR: We will expand our horizons in biology by learning about some of the most extreme microorganisms on the planet - microorganisms that thrive without oxygen, under high temperatures (e.g., in pressurized water above the boiling point), and under chemical stress factors that were once thought to be incompatible with life. Numerous representatives of these microorganisms can be cultured in the laboratory; others have been observed in nature but have so far resisted being tamed. We will look into the unusual habitats where these organisms are found, for example hot springs and volcanic areas on land (Yellowstone) and in the ocean (deep-sea hydrothermal vents). We will also study their evolution during Earth's early history, and learn about the potential of extreme microorganisms as model cases and analogs for life elsewhere in the universe. ABOUT THE INSTRUCTOR: Andreas Teske is a biochemist by training, but became fascinated by the microbial world of the oceans and focused his Ph.D. research on the ecology and diversity of marine bacteria that catalyze the sulfur cycle. After completing his Ph.D. at Bremen University and the Max-Planck-Institute for Marine Microbiology in Germany in 1995, he spent his postdoc years at the Woods Hole Oceanographic Institution and stayed

Prerequisites: *First-year students only. Registration Procedures: *Students who are not enrolled in a fall 2014 FYS register online when their registration appointment begins. *Other students register online beginning Nov 17. ABOUT THE SEMINAR: This seminar is designed to engage students in an exploration of the relevance of mathematical ideas to fields typically perceived as {non-mathematical} (e.g., art, music, film, literature). Equally important will be an exploration of how these {non-mathematical} fields influence mathematical thought. Course activities and assignments have been designed to illuminate the fact that even the most complex mathematical concepts grow out of real people's attempts to understand their world. By the end of the seminar, students should be able to { Identify and assess how mathematical ideas influence and are influenced by ideas expressed through art, music, literature, religion, etc. } Compare and contrast different philosophies concerning the nature of mathematics { Articulate their own well-reasoned ideas concerning the nature of mathematics } Discuss the evolution of fundamental mathematical concepts in a historical as well as a cultural context { Discuss the work and lives of important mathematicians in relation to the {non-mathematical} work of their contemporaries } Identify and assess how their own understanding of mathematical ideas influences the way they interact with the world Course assignments and activities will include weekly readings and

MATH	62H	001	11241	FYS COMBINATORICS	Lecture (Face to Face Instruction)	3	A			
Bldg: Graham Memorial		Room: 0038		Days: TuTh	Time: 11:00 - 12:15		Rank: INST	Load: 100	Instructor: CHEREDNIK,IVAN

Reserve Capacity:		01-OCT-2014	RC PLAN UGRD HONORS			Reserve Enrl Cap: 20		Reserve Enrl Tot: 10		

A leading expert in Modern Combinatorics wants to share his vision of the subject with the students. The seminar is a perfect background for future specialists in mathematics, physics, computer science, biology, economics, for those who are curious what statistical physics is about, what is cryptography, and how stock market works, and for everyone who likes mathematics. The course will be organized around the following topics: 1) Puzzles: dimer covering, magic squares, 36 officers 2) Combinations: from coin tossing to dice and poker 3) Fibonacci numbers: rabbits, population growth, etc. 4) Arithmetic: designs, cyphers, intro to finite fields 5) Catalan numbers: from playing roulette to stock market The students will learn about the history of Combinatorics, its connections with the theory of numbers, its fundamental role in the natural sciences and various applications. It is an advanced research course; all students are expected to participate in projects under the supervision of I.Ch. and the Graduate Research Consultant (the GRC Program). This seminar is partially supported by Honors Carolina. The grades will be based on the exam, bi-weekly home assignments and the participation in the projects. The course requires focus and effort, but, generally, the students are quite satisfied with the progress they make (and their grades too). From the Course Evaluation: "A difficult but wholly worthwhile course: I feel more competent for having taken it", "I would recommend this FYS to others ONLY if Honors Carolina students register online when their registration appointment begins. Other students register online beginning November 17.

Prerequisites *First-year students only. Registration Procedures: *Students who are not enrolled in a fall 2014 FYS register online when their registration appointment begins. *Other students register online beginning Nov 17. ABOUT THE SEMINAR: There is a tremendous effort in almost every scientific discipline to better understand and process the vast amount of data gathered through various sources, commonly referred to as ¿Big Data¿. Data comes from images, video, automatic measuring devices, transactions, computational models etc. Working with this data is often challenging and tools like Excel very quickly come up short. This class focuses on how to analyze and visualize various data sets, including tabular data, spatial data and three dimensional data. How use graphics, animation and interactive manipulation to understand data, compute statistics and quantify results. The class will challenge students to rethink what is data and make them better prepared for working with big and small data in physical, medical, biological and social sciences. ABOUT THE INSTRUCTOR: David Adalsteinsson is an applied mathematician and an Alfred P. Sloan Research Fellow. His work is focused on creating algorithms for numerical solutions to physically relevant problems. Adalsteinsson has written applications intended to be used by scientists and a general audience for creating scientific software and analyzing numerical data. Adalsteinsson wrote the application DataTank which received the ¿Best Scientific Computing Solution for

methods of solution of first and second order differential equations , including the first order system $X' = AX$, where A is a 2×2 matrix ; linearization of nonlinear equations at a critical point ; examples and applications. Differential equations are an essential feature of any science, including economics. PREREQUISITE: AT LEAST A B+ IN MATH 233 OR 233H AT UNC. Honors Carolina students register online when their registration appointment begins. Other students register online beginning November 17. Enrollment capacity increases on Nov 4 (7), Nov 6 (13), Nov 10 (19), and Nov 12 (25).

MATH	410	001	1955	TEACHING & LEARNING MATH	Lecture (Face to Face Instruction)	4	A	
Bldg: Phillips		Room: 0228		Days: TuTh	Time: 12:30 - 13:45	Rank: INST	Load: 100	Instructor: THOMAS,MIRANDA DAWN
Class Enrl Cap:33		Class Enrl Tot:1		Class Wait Cap:0		Class Wait Tot:0		Class Min Enrl:0
Foot note:								Special Grading:GR1
Attributes: E4- Field Work								
Course is for students in the UNC BEST program. Registration through MATH department, Dr. Miranda Thomas.

--------------------------	-------------	---------------------	-----------------------------	----------------------------

Turn of the twentieth century Vienna was a crucible for much of modern life as we know it today. We will explore a wide gamut of music, art, architecture, literature, philosophy and political texts from this fascinating social period, including the eroticism pervading paintings of Klimt, Freud's writings on the roots of human behavior in the subconscious, Karl Kraus' critical social commentary in 'Die Fackel', as well as the roots of Zionism and the Nazi party in Austrian politics. Above all, we will listen to music of Brahms, Johann Strauss, Jr., Gustav Mahler, Richard Strauss, Arnold Schoenberg, Alban Berg and Anton Webern. Class projects will include reports on various historical figures or composers, discussions of texts, and group listening to music. **FIRST YEAR STUDENTS ONLY.** Stefan Litwin has been Professor for Contemporary Music and Interpretation at the Hochschule für Musik Saar since 1992. He was also a Fellow at the Wissenschaftskolleg zu Berlin from 2003 until 2005, where he presented numerous Lecture-Recitals and worked on a larger compositional project. During the season 2005/06, he was Distinguished Artist in Residence at Christ College, Cambridge University, UK. Since 2008, on faculty at the University of North Carolina at Chapel Hill.

Honors Carolina students register online when their registration appointment begins. Other students register online beginning November 17.

Prerequisites: *First-year students only. Registration Procedures: *Students who are not enrolled in a fall 2014 FYS register online when their registration appointment begins. *Other students register online beginning Nov 17. ABOUT THE SEMINAR: This seminar will focus on the incredibly wide variety of performances presented by Carolina Performing Arts. Through research on and attendance at performances, including opportunities to meet the artists, students will explore questions such as: How does music reflect culture? What makes great music? What is the role of music in other genres? What are the obligations of the performer to the composer? What goes into the preparation of a performance? What is the impact of the audience on the performer? How much improvisation takes place in a live performance? What makes a particular performance outstanding, or by contrast, unsuccessful? We will also examine the ideas of virtuosity, curiosity, and re-invention. Students will be provided tickets and will be expected to attend all performances listed below. Musical ability and training is not a requirement for this seminar, although students with musical experiences are welcome. Program and dates are subject to change. Students will attend these performances: The Marinsky Orchestra, Valery Gergiev, Conductor, Sunday, Feb. 1 Kronos Quartet, Thursday, Thursday, Feb 12 Shantala Shivalingappa, (South Indian Dance), Wednesday, Feb. 18 Brian Blade and the Fellowship Band, Friday, Feb. 20 Lecture by Yo Yo Ma

Permission required by instructor and an additional fee for lessons apply, \$200 or \$400.00. Applied Music form must be filled out in Hill Hall 104.
Permission required for enrollment.

An exploratrin of the important and often misunderstood role of the DJ in modern musical life, with particular attention to the ways in which DJing challenges traditional notions of music, musicianship, and musical instruments. Guest lectures, demonostrations, and tutorials by visiting DJs form a significant component of the course.

This seminar will examine the various roles of music in America during World War II. Composers like Samuel Barber, Marc Blitzstein and Aaron Copland were active as soldiers and civil servants, contributing their music to the war effort with works such as Copland's Fanfare for the Common Man and Blitzstein's Airborne Symphony. Jazz, film music, and other popular genres similarly responded to the war. Musicians themselves were involved in the propaganda and diplomatic activities of the Office of War Information, the State Department and U.S.O. In this seminar we will explore these and other war-time roles of music and musicians through readings and research projects. No prior musical knowledge or abilities are required. Annegret Fauser is Cary C. Boshamer Distinguished Professor of Music at the University of North Carolina at Chapel Hill. Her research engages with music and culture in France and the U.S. in the nineteenth and twentieth centuries. Monographs include Musical Encounters at the 1889 World's Fair (2005) and Sounds of War: Music in the United States during World War II (2013). The recipient of the 2011 Dent Medal of the Royal Musical Association, she has held numerous fellowships in Australia, Europe,

and the United States. From 2011-13, she was Editor-in-Chief of the Journal of the American Musicological Society. Honors Carolina students register online when their registration appointment begins. Other students register online beginning November 17. Enrollment capacity increases on Nov 4 (4), Nov 6 (8), Nov 10 (12), and Nov 12 (16).

In this seminar, we will examine the role of music and related expressive culture in the ongoing human conflict between Israel and the Palestinians. At the same time, the course will introduce students to the broader role of music in the critical study of violence in human societies. Together, we will look at how music has been used to rally support for and protest against wars, settlements, occupation, terrorism, and the violent status quo. In this seminar we will explore these and other roles of music and musicians through readings and research projects. No prior musical or foreign-language experience is required. Michael A. Figueroa is an ethnomusicologist who researches the relation between music, place, and violence in the Middle East and Mediterranean regions. His current book project focuses on how national space is musically and poetically constructed in Israel/Palestine, with a focus on the critical moment of the Six-Day War of 1967. A multi-disciplinary study of musical-poetic practice (including public rituals of commemoration, festivals, recording projects, and a variety of print and mass media), the monograph will explore the close relation between musical knowledge and spatial justice in the region. His additional research interests include music and memory in/of Muslim Iberia, global popular music, black music, music and violence, music and literature, hermeneutics, and the analysis of song. He holds a Ph.D. in Ethnomusicology from the University of Chicago and a B.A. in Musicology from Northwestern

Prerequisites: *First-year students only. Registration Procedures: *Students who are not enrolled in a fall 2014 FYS register online when their registration appointment begins. *Other students register online beginning Nov 17. ABOUT THE SEMINAR: This seminar aims to encourage students to think seriously and clearly about ethical problems by means of class discussion, group research projects, and examination of philosophical and literary works. Theoretical issues to be considered include relativism, utilitarianism, deontological ethics, and virtue ethics. Practical issues may include abortion, substance abuse, treatment of animals and the environment, and sex, love, and marriage. ABOUT THE INSTRUCTOR: Thomas Hill is a Kenan Professor in the Department of Philosophy. Professor Hill has written extensively in ethics, the history of ethics, and political philosophy.

This course will explore some of the main topics in philosophy of religion by drawing on works in philosophy, literature, and film. The questions we will consider include: Does God exist? What is faith, and is it rational? Do we survive our bodily deaths, and if not, should we fear death? We will also explore the implications of answers to these questions for the meaning and value of our lives. The course will include readings by Dostoevsky, Viktor Frankl, William James, C.S. Lewis, Rousseau, and Tolstoy. CROSSLISTED WITH RELI 126H. Ryan Preston-Roedder joined the philosophy department in Fall 2008. He specializes in moral and political philosophy and philosophy of religion. He also has interests in medical ethics. His current work focuses on moral rights, the moral significance of trust and faith, and justifications for partiality. Before joining the philosophy department, Ryan was a Faculty Fellow at the Edmond J. Safra Foundation Center for Ethics at Harvard.

A study of selections from classic works in political philosophy from Thomas Hobbes to John Rawls. Questions include: What is the source of political authority and the obligation to obey the law? When, if ever, is revolution justified, and why? What are the requirements of justice, for example, regarding property, individual liberties, and democratic procedures? Is the idea of a social contract relevant today? Discussion will be emphasized. Class presentations, papers, and exams will be required. Thomas Hill teaches ethics and political philosophy. His writing concerns both cur								

Honors Carolina students register online when their registration appointment begins. Other students register online beginning November 17. Enrollment capacity increases on Nov 4 (6), Nov 6 (12), Nov 10 (18), and Nov 12 (24).

In this course we will explore the development of ancient Greek thought from its beginnings in the 6th century BCE down to the end of the classical period. The major figures studied will be the Presocratic philosophers, Socrates, Plato, and Aristotle. We will attempt to answer such questions as: 'What factors may have helped to spark the onset of Western philosophy and science?', 'What were the most important contributions made by the major Presocratic philosophers (the Milesians, Xenophanes, Pythagoras, Heraclitus, and Parmenides)?', 'What difficulties do we face in determining the nature of Socrates' philosophical ideas, and what, so far as we can tell, were his chief innovations?' What were the main elements of Plato's thought as they surface in dialogues such as the *Meno*, *Republic*, *Symposium*, and *Parmenides*? and 'What were Aristotle's chief contributions to Greek philosophy and science?' Course requirements: A mid-term exam, one 8-10 page paper, and the final exam, each counting for one-third of the semester grade. There will be some presentation of materials by the instructor but the emphasis will be placed on student presentations and discussions. Review questions will be provided in advance of each exam. Required Text: Cohen, Curd, and Reeve, *Readings in Ancient Greek Philosophy*, 4th edition. (Earlier editions have different contents and should not be purchased.) J. H. Lesher has written four books and more than sixty articles on aspects of ancient Greek philosophy. He is especially interested Honors Carolina students register online when their registration appointment begins. Other students register online beginning November 17. Enrollment capacity increases on Nov 4 (5), Nov 6 (10), Nov 10 (15), and Nov 12 (20).

In this course we will interpret African American political thought as an extended response to a well known paradox of Thomas Jefferson: on the one hand in the Declaration of Independence appearing to found the new country on the idea of human equality; on the other hand in his Notes on the State of Virginia appearing to insist that African Americans could never be American citizens. After getting clear on the meaning of the paradox we will examine the African American response to it in the works of Martin Delany, Frederick Douglass, W.E.B. DuBois, and Booker T. Washington. We will conclude our study with several essays by contemporary African American philosophers. My research interests are mainly in African American political thought.								
Honors Carolina students register online when their registration appointment begins. Other students register online beginning November 17. Enrollment capacity increases on Nov 4 (6), Nov 6 (12), Nov 10 (18), and Nov 12 (24).

The Rule of Law: National and Global Perspectives. In this course, we will explore the connections between law and justice. The central organizing idea is

the notion of "the rule of law." This notion played a very large role in Western political thinking since the middle ages and in modern constitutional thought. Over the last century it has had a strong presence in thinking about the international legal order. The world-wide respect for the ideal is (in part) the legacy of the Nuremberg Trials in which Nazi war criminals were tried by an international tribunal. Yet, those trials themselves seemed to compromise the ideal. The trials and the notion of the rule of law have remained controversial. Some believe that the ideal of the rule of law can be derived from a sound understanding of law itself, others argue that it has its roots in fundamental notions of liberty, others attack it as a piece of Western (or American) ideology. This course will explore the philosophical foundations and practical applications of the notion of the rule of law, and will focus on the importance of the rule of law in the international domain for protection of human rights. Book: Selected reading from Hobbes, Kant, contemporary legal theorists. Most readings available in electronic form. Gerald Postema has published extensively in legal and political philosophy and ethics. He has edited the Cambridge Studies in Philosophy and Law and (with Michael Corrado) Law & Philosophy. Honors Carolina students register online when their registration appointment begins. Other students register online beginning November 17. Enrollment capacity increases on Nov 4 (6), Nov 6 (12), Nov 10 (18), and Nov 12 (24).

Reserve Capacity:		17-OCT-2014	RC CLAS UG FFYS	STDTS	Reserve Enrl Cap: 24		Reserve Enrl Tot: 0	
Prerequisites: *First-year students only. Registration Procedures: *Students who are not enrolled in a fall 2014 FYS register online when their registration appointment begins. *Other students register online beginning Nov 17. ABOUT THE SEMINAR: The nanoworld is a strange and captivating place. is a world of molecules vibrating trillions of times a second, quantum dots emitting rainbow colors, DNA encoding information in molecular bonds, and protein motors driving the complex machinery of the cell. At this scale, nature has unique rules and behaviors, some of which are amazing and unexpected. We are still uncovering these rules, and are only beginning to apply this new knowledge to technology. Can we build molecular machines that cure disease or clean up the environment? Can we make computers using single molecule transistors? How do viruses and other bio systems assemble themselves? In this seminar, we dive into the basic physics, chemistry and biology that describe the nanometer scale world. We will also try to distinguish the true promise of nanoscience from the hype. Students will engage in class discussions informed by their weekly reading of selected scientific literature. They will also participate in small group projects building physical models of nanoscale objects and phenomena, and perform calculations to gain a quantitative understanding of the physics underlying the nanoworld. No prerequisite is required for this course, but a spirit of adventure is. ABOUT THE								

PHYS	54	001	7335	FYS: PHYSICS OF MOVIES	Lecture (Face to Face Instruction)	3		A

		18-NOV-2013	RC CLAS UG FFYS	STDTS	0		0	

Prerequisites *First-year students only. Registration Procedures: *Students who are not enrolled in a fall 2013 FYS register online when their registration appointment begins. *Other students register online beginning Nov 18. ABOUT THE INSTRUCTOR: Christian Iliadis obtained his diploma in physics from the University of Muenster/Germany and then moved to Notre Dame where he received his Ph.D. He spent three years in Vancouver, working in Canada's largest nuclear physics laboratory. Since 1996, he has been Professor of Physics and Astronomy at UNC-Chapel Hill, teaching a variety of undergraduate and graduate courses. His research specialty is nuclear astrophysics, which is the science of how stars generate energy and produce the elements in the Universe via nuclear fusion reactions. He also published a textbook on this subject. His favorite hobby is soccer (or football, as it is called in the rest of the world). ABOUT THE COURSE: In this seminar, we will analyze physics concepts by watching scenes from popular movies. The overall goal is to disentangle the complicated interplay of physics ideas in real-life situations and thereby to improve significantly our problem-solving skills. Emphasis is placed on group work rather than on traditional teaching. We will be addressing questions such as: Which scenes from movies are unphysical and which are realistic? How are physicists portrayed in movies? How does physics research influence society? Ultimately, we will gain a more fundamental understanding for physical concepts

Prerequisites: *First-year students only. Registration Procedures: *Students who are not enrolled in a fall 2014 FYS register online when their registration appointment begins. *Other students register online beginning Nov 17. ABOUT THE SEMINAR: Since the start of the Great Recession in 2007, the US economy has lost nearly 8 million jobs. While the impact is of national concern, these job losses have been concentrated inside metropolitan areas where 87 percent of the US population now lives. As a result, urban policy makers face a host of problems, including fiscal distress and high unemployment while simultaneously facing unique urban issues such as intense concentration of poverty and sprawl. This seminar will study trends in both economic change and urbanization and how they overlap in order to shed light on how planners and policy makers can offer solutions to solve the economic crisis in their communities. This seminar is organized around three themes. The first asks, Why do cities exist, and How do they grow? Next, we will turn our attention on the issues of urban industrial decline and suburbanization and examine how these processes impact the spatial structure of US metropolitan areas and define the 'problems of economic development; that policy makers seek to address. Lastly, we will introduce and critique the policy {toolbox; that urban leaders use to address employment decline, including business recruitment, industrial retention, and regionalism. We will conclude by evaluating the merits the most

Prerequisites: *First-year students only. Registration Procedures: *Students who are not enrolled in a fall 2014 FYS register online when their registration appointment begins. *Other students register online beginning Nov 17. ABOUT THE SEMINAR: Higher education is undergoing rapid transformation that may dramatically change the undergraduate college experience. This course will examine a variety of urgent questions facing American colleges and universities. Is higher education preparing students for the jobs of the future? How should students pay for school? What should be the role of college athletics? What effects do current state and federal regulations have on colleges and universities? What role will technology have on learning? Students will explore topics further through position papers, oral presentations, and the opportunity to create their own model college of the future. ABOUT THE INSTRUCTOR: Melinda Manning is a former university administrator and current graduate student who teaches in Public Policy. Her research interests are in ethics, civility, resilience building and higher education. She received both her undergraduate and law degrees from UNC-Chapel Hill. In 2010, she received the University Award for the Advancement of Women.

Fifteen years into the 21st Century, the challenges facing society -- from the threat of conflict and pandemic disease abroad to economic stagnation and educational decline at home -- are as complex and interconnected as ever before. Increasingly, scholars, policymakers, and civic leaders recognize that the solutions to these problems must be as multifaceted as the problems themselves. Top-down, government-centered interventions have often proved inadequate to the challenge at hand, giving rise to a new generation of social innovators in the private and non-profit sectors who seek to address public problems in novel ways. Yet even in this era of polarization and gridlock, government remains an essential instrument of our common purpose in a democracy (and, often, a funder of last resort) and must therefore be a part of the solution. This seminar will analyze the work of policy entrepreneurs in six "sectors" of American society: the public sector (government), the private sector (business), public-private partnerships (P3s), the non-profit sector (NGOs and service providers), the philanthropic sector (foundations), and the academic sector (universities and research organizations). While the seminar will highlight innovative organizations and consider the elements of broader systemic change, the focus here will be on the individual: on the elected officials, civil servants, business leaders, community organizers, advocates, and ordinary citizens who use innovative approaches to serve the public good. In so doing, our Honors Carolina students register online when their registration appointment begins. Other students register online beginning November 17.

Prerequisites: *First-year students only. Registration Procedures: *Students who are not enrolled in a fall 2014 FYS register online when their registration appointment begins. *Other students register online beginning Nov 17. ABOUT THE SEMINAR: This seminar provides an introduction to entrepreneurship and innovation, and considers their relationship to economic growth. The focus is on historical examples of entrepreneurs who created enduring innovations, emphasizing the context that set the stage, the strategy employed by the entrepreneur, and the public policies that supported the opportunity and the growth of the enterprise. The objective is to recognize the potential of new technologies, changes in consumer taste and shifts in the external environment as economic opportunities. The course emphasizes entrepreneurs as part of a larger societal system that both determines what is possible and also changes in response to entrepreneurial actions. The role of public policy in providing incentives for entrepreneurship and innovation and setting social priorities is discussed. ABOUT THE INSTRUCTOR: Jason Marc Cross is a lawyer and anthropologist. His teaching, scholarship, and consulting address the role of law and technology in global health, human rights, international development, and science and technology governance. Cross's research examines how law and technology are used to manage expert knowledge and public participation in decision-making with humanitarian objectives. His writing

Prerequisites: *First-year students only. Registration Procedures: *Students who are not enrolled in a fall 2014 FYS register online when their registration appointment begins. *Other students register online beginning Nov 17. ABOUT THE SEMINAR: It has been estimated that 10 percent of the high schools in the U.S. produce over 50 percent of the nation's drop-outs. Transforming these schools that have been referred to as 'Drop-out Factories' has been a high priority for the federal government and here in North Carolina. Indeed, relative to other states, North Carolina has a remarkably high fraction of these schools. In this seminar, we will examine the causes, consequences, and reform strategies that have been developed to address problems of chronically low performing schools. The class will analyze data to find the underlying problems in these schools, examine research on the effectiveness of various strategies that have been used in North Carolina and elsewhere, and design a reform plan for high schools in North Carolina. ABOUT THE INSTRUCTOR: J.B. Buxton is the founding principal of the Education Innovations Group, a consulting practice focused on state education strategies for PreK-12 and postsecondary public education. Buxton works with state departments of education, national foundations, and state, regional and national organizations focused on dramatic improvements in public education. Clients include organizations such as the Bill & Melinda Gates Foundation, the Southern

Why History Matters to Public Policy This course explores the uses of history and historical perspectives for public policy makers. Historical processes have shaped today's public policies, and understanding the origins and development of a policy can inform current policy decisions. Using case studies, this course offers historical frameworks for understanding the development of American public policy since World War II. We will also bring historical analysis to bear on specific policy areas of contemporary public policy and consider important methodological questions about how and why history matters to policy makers.

Law and Public Policy. A legal system is an integral part of a nation's political system. It provides mechanisms for implementing and reformulating public policies, for resolving individual and group conflicts, for bringing about changes in individual and organizational behavior, and for holding political and economic processes to certain standards of fairness. Law is thus one of the main technologies of action of individuals and of the American state. This seminar course covers four big themes: (1) the relationship between law/courts and society (including public perceptions and assessments of judicial institutions and implementation and impact of judicial and legal policies); (2) the nature and contours of the American state; (3) the law as a technology of communication; and (4) the state presence in society.

Macroeconomics and Public Policy taught by Dr. Xingwang Qian. The course is built to introduce the concepts of money, banking and other macroeconomics elements and provide necessary analytical tools to study the data and the events of macroeconomics. It further helps students analyze the interaction between public policies and macroeconomics factors and apply those analytical tools to critically read and understand the real world economic and social issues.

Prerequisites: *First-year students only. Registration Procedures: *Students who are not enrolled in a fall 2014 FYS register online when their registration appointment begins. *Other students register online beginning Nov 17. ABOUT THE SEMINAR: The face of the American worker is changing and the challenges American workers face are ever evolving. In the wake of recent events like the Occupy Wall Street protests, the public in general is becoming more aware of issues like income inequality, living wages, and the role of unions in the workplace. This seminar will explore the American worker from a legal, economic, and social justice perspective. Additionally, the legal framework Americans operate within in respect to labor law will be compared and contrasted with international standards and labor rights. The seminar will also feature an analysis of the American worker through classic film and fictional literature. ABOUT THE INSTRUCTOR: Michele M. Hoyman teaches in the Political Science Department and in the Master of Public Administration program. She received her Ph.D. in Political Science from the University of Michigan. Professor Hoyman's interests are in economic development, sustainable development, industrial labor relations, and public sector personnel. On a personal level, she is an avid UNC basketball fan and spends her spare time being walked in the park by her dog, Tilly. She is afflicted with an unrelenting sense of humor.

Reserve Capacity:		17-OCT-2014	RC CLAS UG FFYS	STDTS	Reserve Enrl Cap: 24		Reserve Enrl Tot:		0

Prerequisites: *First-year students only. Registration Procedures: *Students who are not enrolled in a fall 2014 FYS register online when their registration appointment begins. *Other students register online beginning Nov 17. ABOUT THE SEMINAR: This seminar examines the current issues of United States policy toward Latin America, viewed from a historical perspective that emphasizes two centuries of continuous change. Each issue is paired with a country or region of Latin America, including immigration policy with Central America, economic integration with Mexico, drug trafficking with the Andean countries, and great-power hegemony with Cuba. Tying these issues together is an ongoing theme of cultural identity or, more specifically, of the strongly entrenched view that Latin America is socially, politically, and economically underdeveloped. The general goal is to explore the various ways in which Latin America and the United States are now merging. ABOUT THE INSTRUCTOR: Lars Schoultz, William Rand Kenan, Jr., Professor of Political Science, received his B.A. and M.A. from Stanford University and his Ph.D. from UNC. His area of special interest is inter-American relations. He has held a Fulbright-Hays Doctoral Dissertation Fellowship in Buenos Aires to study Argentine electoral behavior, two postdoctoral research grants from the Social Science Research Council to study United States policy toward Latin America, and a Ford Foundation grant to study U.S. immigration policy. He has been a MacArthur Fellow in

Prerequisites: *First-year students only. Registration Procedures: *Students who are not enrolled in a fall 2014 FYS register online when their registration appointment begins. *Other students register online beginning Nov 17. ABOUT THE SEMINAR: This seminar focuses on explaining and understanding social movements and the collective political behaviors that they promote (e.g. demonstrations, riots, strikes, and eco-terrorism). Our theoretical focus will be interdisciplinary, drawing on research in political behavior, social psychology, sociology, political theory, and the law. We will discuss when and why collective action occurs, who participates, what forms it takes, and how governments respond. Substantively, we will study a variety of movements including: the Tea Party movement, the Environmental movement, the Animal Rights movement, the America Militia movement, the White Nationalist movement, and the Occupy Wall Street movement. We will use a variety of approaches and resources: class discussions, films, wiki writing, online discussions, novels, and texts. Grades will be based on class participation, a writing project, and several group wiki papers. ABOUT THE INSTRUCTOR: Pamela Conover, Burton Craige Professor of Political Science, was educated at Emory University, and received her Ph.D. at the University of Minnesota. Professor Conover teaches courses dealing with political psychology, and women and politics. In the past, Professor Conover's research has concerned the nature of political thinking, and the

Humans and non-human animals have lived together since time immemorial, our relationships exhibiting a range of qualities, including interdependence, hostility, indifference, and care. Despite the fact that our form of life is always one lived in close proximity to the animal world, we tend to think of non-human animals as existing outside the boundaries of political life; indeed, animal life has been, at best, a marginal topic in the field of political science. But animals have always played a fundamental role in our political and ethical thought, even since ancient times. The ancients figured their encounters with animals in a much different way than we do to today. Talk of rights was nowhere to be found, nor was talk of suffering particularly present. The ancients did talk of animals; intellectual and affective capacities but had only a marginal role. What sorts of arguments, then, were made on their behalf, if any? How do those compare with the early moderns figuring of animals, and with ours today? Over time, a range of different arguments have come to be made on behalf of animals and we will look carefully at some of these in the course, as many of these claims play out on explicitly political grounds. Increasingly, political thinkers are challenging commonly held beliefs about the political and ethical standing of animals and attempting to illuminate the ways in which animal life actually animates much of political theory and politics today. In the spirit of these emerging debates, this Honors Carolina students register online when their registration appointment begins. Other students register online beginning November 17.

```

Prerequisites: *First-year students only. Registration Procedures: *Students who are not enrolled in a fall 2014 FYS register online when their registration appointment begins. *Other students register online beginning Nov 17. ABOUT THE SEMINAR: Listening to cable news commentary and talk radio, or reading political blogs and opinion columns, it sometimes feels like American opinion leaders spend all their time bad-mouthing political parties and policies without rhyme or reason. Listen more closely, however, and you will find even the most loud-mouthed critics dwell on favorite themes, and many of the values and beliefs they express can be traced to long-existing concerns of public intellectuals and political philosophers. We will attempt to understand contemporary American ideologies as expressing different sets of (sometimes overlapping) preoccupations, and analyze the different meanings attributed to key concepts such as liberty, justice, fairness, and security, placing them in the context of broader intellectual history in the U.S. The seminar is discussion oriented, placing special emphasis on thoughtful and respectful class participation. Prompt completion of weekly reading assignments is required and students should expect to improve written and verbal communication skills. ABOUT THE INSTRUCTOR: Justin H. Gross (A.B. Brown University, Ph.D. Carnegie Mellon University) studies political communication, ideology and social science methodology (statistical inference, social network analysis,

An introductory course designed to explain the basic processes and issues of the American political system. My primary teaching and research interests are American political institutions, the U.S. Congress, and elections. I am interested in the role institutional features play in decision making of individuals.

Honors Carolina students register online when their registration appointment begins. Other students register online beginning November 17. Enrollment capacity increases on Nov 4 (6), Nov 6 (12), Nov 10 (18), and Nov 12 (24).

Political behavior is the study of attitudes, ideology, and engagement with the government. This covers a wide range of issues and questions. For example, why are some individuals more likely than others to support specific policies? How do we understand the connection between individual voters and political parties? What makes an individual more or less likely to vote? When and where are broad social movements, wars, rebellions and revolutions most likely to occur? Comparative political behavior is the study of how all these phenomena operate across nations and regions with different institutional and cultural environments. Rahsaan Maxwell is an Associate Professor in the Department of Political Science at the University of North Carolina, Chapel Hill. His research explores the politics of racial, ethnic, religious, and immigrant-origin minorities, often focusing on Western Europe. He has examined numerous issues including minority political attitudes, identity, representation, and acceptance in mainstream society. Honors Carolina students register online when their registration appointment begins. Other students register online beginning November 17. Enrollment capacity increases on Nov 4 (6), Nov 6 (12), Nov 10 (18), and Nov 12 (24).

An introduction to the politics of the People's Republic of China with a focus on the Reform Era. Provides a working knowledge for understanding political events in contemporary China in three parts: historical background, evolution of political institutions, and changing relations between ordinary people and the Chinese state.

<p>Poli 276 (Major Issues in Political Theory): Latin American Political Thought This course will serve as an introduction to the history of political thought in both Spanish-America and Brazil. Latin American political thought constitutes a growing subject focus within political theory. This course will survey a selection of major works that have been produced over the last five centuries;from the earliest days of colonization, through the wars of independence, and up to the present day. Some of the themes and topics we will cover in this course are: evolving conceptions of race and ethnicity; the construction of gender roles; the relationship between violence and authority; the role of the state; political and civil rights; nationalism; and the historical influence of the United States. While some background knowledge of Latin America can be beneficial for engaging with these texts, there are no perquisites for this course. Further, since we will only be reading English translations of these major works, knowledge of Spanish and Portuguese is also not required.</p>

Examines the politics of the United States Congress. Emphasis on representation, elections, and policy making. My primary teaching and research interests are American political institutions, the U.S. Congress, and elections. I am interested in the role institutional features play in decision making of individuals.								
Honors Carolina students register online when their registration appointment begins. Other students register online beginning November 17. Enrollment capacity increases on Nov 4 (6), Nov 6 (12), Nov 10 (18), and Nov 12 (24).

Political decision-makers engage in a range of activities considered peripheral to the standard political science curriculum. This course covers tradecraft in politics, the stuff of politics behind the scenes, including bargaining and persuasion, transformational leadership, agenda setting and compromise, setting organization and operational routines, delegation and derivative authority, decentralization and committees, lobbying strategies, discerning intentions, etc. Each of these topics involve confidential political engagement, in the black box, that determine the nature of political outcomes. The curriculum will consider many of the standard attempts to grapple with tradecraft, e.g, in bargaining the Baron/Ferejohn model, but it aims to supplant those common models with ones that take on more realistic assumptions and which emphasize the underlying nature of the process. For example, while the B/F models declares it models bargaining, it assumes away any give and take between bargainers, it assumes away bluffing and other useful persuasive strategies that rest on guile, and it reduces politics to simplistic standards, like who goes first and minimum winning coalitions. As another example, in setting agendas, standard models focus on the number of agenda items and what makes those fluctuate. These assume away questions about how much to ask for, whether to bid to the median (or other "pivots") as opposed to ignoring them or when to give in to compromise? The curriculum will also attempt to build

As adults we constantly make judgments about other people's beliefs, desires, goals, knowledge, and intentions from evidence like eye gaze and inferences from their words and actions. These judgments together can be called mindreading, or theory of mind (where ¿theory¿ refers to the theory someone might hold about another¿s mental state, not a scientific theory). This information is known to guide some aspects of language use -- for example, you wouldn't ask someone to hand you ¿that book¿ if they don't know it exists. But sometimes you might ignore what someone else does or does not know ¿ for instance asking someone for ¿the red book¿ when that person is sitting in front of two red books. This course examines how children, adults, and individuals with autism infer other people¿s mental states, and how they use it to guide decisions during speaking and understanding. This seminar will follow a discussion format.

FIRST YEAR STUDENTS ONLY. Dr. Jennifer Arnold is an Associate Professor in the Department of Psychology. She studies the ways that our minds handle the jobs of speaking and understanding. How do speakers choose words and produce them? How do listeners pick out the speaker's meaning? Her research is guided by questions about how people represent the thoughts, intentions, and mental activities of other people, and how this information influences specific linguistic processes.

Honors Carolina students register online when their registration appointment begins. Other students register online beginning November 17.

Prerequisites: *First-year students only. Registration Procedures: *Students who are not enrolled in a fall 2014 FYS register online when their registration appointment begins. *Other students register online beginning Nov 17. ABOUT THE SEMINAR: Illicit and legal drugs make the user feel good but also promote the development of dependence and long-lasting changes in brain physiology. In this biological psychology seminar, we will take a multi-disciplinary approach to learn about the neurobiology of drug addiction with a focus on the following questions: How do we define addiction? Are media depictions of drug addiction accurate? What are the beneficial and harmful psychological effects of abused drugs? What has scientific research revealed about the neurobiology of the ¿brain on drugs¿? Do most users become addicts? We will tackle these questions through classroom discussions/debates, lectures, movies, and writing assignments. In this communication intensive seminar, critical analysis of information about the neurobiology of addiction will be used to separate fact from fiction. ABOUT THE INSTRUCTOR: Dr. Kathryn (Kate) Reissner received her PhD from the University of California, where she performed research on the neurobiology of learning and memory. Dr. Reissner went on to perform postdoctoral research at the Medical University of South Carolina, where she studied the role of glutamate transport in the development of cocaine addiction. She joined the Department of Psychology at UNC-CH as

This course provides an introduction to the study of maladaptive or abnormal behavior of adults. The emphasis will be on the description of various symptom patterns of maladjustment, theory and research on the causes of such behavior, and the prevention and treatment of maladaptive behavior patterns. The course provides you with an opportunity to observe videotapes of individuals who experience these disorders, and the chance to develop your own conceptualization of how a given individual developed a specific disorder, along with creating a treatment plan for this person. My hope is that you will not only learn specific information about the various disorders, but in addition you will learn to think about adaptive and maladaptive behaviors in a thoughtful, realistic manner from a psychological perspective. PREREQUISITE: PSYC 101 Areas of Research: Marital distress, cognitive-behavior therapy, gender differences.

Honors Carolina students register online when their registration appointment begins. Other students register online beginning November 17. Enrollment capacity increases on Nov 4 (6), Nov 6 (12), Nov 10 (18), and Nov 12 (24).

This course focuses on how we know what we currently know about both the structure and the function of the nervous system. In this class, we will consider

how neuroscience emerged as a multidisciplinary field. The class will cover key research and breakthroughs, along with the people who made those discoveries. We will consider these discoveries within a historical context ¿ what was going on in the world at the time? How did this impact the field?

PSYC	493	001	11944	INTERNSHIP IN PSYCHOLOGY	Lecture (Face to Face Instruction)	3		A
Bldg: Dey Hall		Room: 0207		Days: M	Time: 14:30 - 15:20	Rank: INST	Load: 100	Instructor: BUZINSKI,STEVEN G.

<p>Prerequisites: *First-year students only. Registration Procedures: *Students who are not enrolled in a fall 2014 FYS register online when their registration appointment begins. *Other students register online beginning Nov 17. ABOUT THE SEMINAR: This seminar is an introduction to the Islamic faith and tradition, focusing on religious thought and practice in both their historical and contemporary dimensions. We will approach the study of Islam thematically and with several core questions in mind: what is the role of scripture and interpretation in Islam, how is religious authority constituted, and how has Islam been studied? The course aims to engage with popular and media representations of Islam and Muslims, and to think critically about their dynamics, politics, and utility, thus students will be pre-introduced to the Islamic tradition in its varying and changing contexts. Major themes include religious practice, ethics and Islamic law, beliefs, artistic expressions, intellectual production, and politics. ABOUT THE INSTRUCTOR: Carl Ernst is a specialist in Islamic studies, with a focus on West and South Asia. His published research, based on the study of Arabic, Persian, and Urdu, has been mainly devoted to the study of three areas: general and critical issues of Islamic studies, premodern and contemporary Sufism, and Indo-Muslim culture. His most recent projects in Islamic studies have addressed issues of public scholarship relating to Islamophobia, the problem of reading the Qurʾān, a critical rethinking</p>

This course will explore some of the main topics in philosophy of religion by drawing on works in philosophy, literature, and film. The questions we will consider include: Does God exist? What is faith, and is it rational? Do we survive our bodily deaths, and if not, should we fear death? We will also explore the implications of answers to these questions for the meaning and value of our lives. The course will include readings by Dostoevsky, Viktor Frankl, William James, C.S. Lewis, Rousseau, and Tolstoy. CROSSLISTED WITH PHIL 134H. Ryan Preston-Roedder joined the philosophy department in Fall 2008. He specializes in moral and political philosophy and philosophy of religion. He also has interests in medical ethics. His current work focuses on moral rights, the moral significance of trust and faith, and justifications for partiality. Before joining the philosophy department, Ryan was a Faculty Fellow at the Edmond J. Safra Foundation Center for Ethics at Harvard.

Honors Carolina students register online when their registration appointment begins. Other students register online beginning November 17. Enrollment capacity increases on Nov 4 (3), Nov 6 (6), Nov 10 (8), and Nov 12 (10).

Although it became renowned as a branch of New Age spirituality when Madonna took a break from her pop star career to study under Hindu masters in India, mysticism has historically played an important role in religious experience for many members of institutional religions. In this course, we will consider mysticism in orthodox religions, particularly the ways in which mystical texts reflect and challenge normative spirituality. Historical, scriptural, and doctrinal background will be provided for Christianity (medieval Catholicism), Islam (medieval Sunni Sufism), and Buddhism (medieval Theravada, Mahayana, Tantra, Zen). Grounding in the multiplicities of spirituality and theology available in each of the religions will allow us to assess mystical experience under three rubrics: "Transcending Language," "The Limits of the Visual," and "Gender and Eroticism". Boon received her undergraduate degree in humanities from Yale and her PhD in Religious Studies from UPenn. She studies medieval and Renaissance Catholicism, particularly spirituality and mysticism.

in Inquisition Spain. Her theoretical interests include gender and sexuality, religious material culture, and history of science as it relates to spirituality. She offers courses on the Reformation, comparative mysticism, and religion in the early modern Ibero-Atlantic world. Honors Carolina students register online when their registration appointment begins. Other students register online beginning November 17. Enrollment capacity increases on Nov 4 (6), Nov 6 (12), Nov 10 (18), and Nov 12 (24).

The course aims at exploring the Christian evangelical tradition as a global movement. It will begin by examining the historical and theological roots of the evangelical movement in continental Europe and the English-speaking world in the 17th and 18th centuries, and the crystallization of evangelicalism into a more cohesive movement in the 19th century. We will look at the major developments in evangelicalism in the 20th century and the major groups that operated within the movement. We will then proceed to study the global nature and expressions of evangelicalism in our time. The course will examine the influence of evangelicalism in different regions of the world, the varied roles this movement has played and the shapes it has taken in different places. This includes countries in Latin America, Africa, Eastern Europe, East Asia and the Middle East. We will also take notice of the different characteristics of evangelicalism in various English speaking countries and look at the variety of evangelical groups in the United States and the global influences that, at times, helped shaped their character. Among other issues the course will try to confront the question of what has attracted, in the last generation, tens of millions of converts, all around the globe, to this brand of Christianity. At the same time, we will pay attention to different social and cultural realities in which evangelical groups have operated around the globe and take notice of the communal forms and political stands that evangelicalism has. Honors Carolina students register online when their registration appointment begins. Other students register online beginning November 17. Enrollment capacity increases on Nov 4 (6), Nov 6 (12), Nov 10 (18), and Nov 12 (24).

Prerequisites: *First-year students only. Registration Procedures: *Students who are not enrolled in a fall 2014 FYS register online when their registration appointment begins. *Other students register online beginning Nov 17. ABOUT THE SEMINAR: This seminar explores various narratives by which Mexican women expect and are expected to live. Participants read letters, stories, and short novels by Mexican women of the twentieth century whose writing transgresses several genres and challenges traditional notions of gender and marginality. Taking into account the negative impact that religion, colonialism, nationalism and modernization have had on the representation of Mexican women, the course addresses, among other themes and topics, the role of memory and discourse; the inevitable formation of otherness; identity construction; gender ambiguities; moral subversions and inversions; textual experimentation and performance; and the long-lasting effects of gender violence and its portrayal as a psychological trauma. We will read in English or in English translation works by Elena Poniatowska, Sandra Cisneros, Cristina Rivera Garza, Ana Clavel, Margo Glantz, and Ángeles Mastretta, among others. ABOUT THE INSTRUCTOR: Oswaldo Estrada focuses primarily on the literatures of Mexico and Peru. He studies the aesthetic effect of rewriting history, gender formation and transgression, and the construction of identities in the twentieth and twenty-first centuries.

Reserve Capacity: 01-OCT-2014 RC PLAN UGRD HONORS Reserve Enrl Cap: 15 Reserve Enrl Tot: 1

If you love to discuss good writing and think about important issues, this is the course for you. The course has a twofold purpose: (1) to help students gain greater confidence in reading, understanding, and discussing literary texts; and (2) to introduce the essential vocabulary, terms, and approaches used in analyzing Hispanic literature. Using Carmelo Virgillo, et. al., Aproximaciones al estudio de la literatura hispanica, students will read and discuss selected short stories, plays, poems, and a novel from major Spanish and Spanish-American authors. The course also focuses on the cultural, social and historical context of these works. Designed to advance the student's mastery of the Spanish language, provide him/her with the tools necessary for further literary studies, and to provide him/her with different views of the world through the filter of literature. This honors section will put quite a bit of emphasis on active, oral participation. The course also requires the writing of 2-3 short papers to prepare students for longer assignments in more advanced courses. And if you've ever dreamed of being in the movies? There will also be a creative final project: a film adaption of one of the readings.

PREREQUISITE: OUTSTANDING PERFORMANCE IN SPAN 204 OR EQUIVALENT. STUDENTS WHO ARE NOT MEMBERS OF HONORS CAROLINA MUST OBTAIN RECOMMENDATION FORM FROM THEIR CURRENT FOREIGN LANGUAGE INSTRUCTOR AND DELIVER IT IN PERSON TO THE HONORS CAROLINA OFFICE (225 GRAHAM MEMORIAL) BEGINNING NOVEMBER 17. Honors Carolina students register online when their registration appointment begins. Other students register online beginning November 17. Enrollment

capacity increases on Nov 4 (5), Nov 6 (10), Nov 10 (15), and Nov 12 (20).

<p>Interpersonal communication is about our connections with other human beings. Communication shapes our understandings of ourselves, others, organizations and social systems. Our communication creates and recreates the social worlds in which we reside. We often take interpersonal communication for granted assuming that we already know much of it because we engage it on a daily basis. Yet, through engaged study, we will come to realize that interpersonal communication is complicated, consequential, and crucial. This course provides a space to openly analyze and discuss the role interpersonal and organizational communication plays in our understanding of self, other, and everyday life as constituted through the relationships that we create, sustain and sometimes end. CROSSLISTED WITH COMM 120H Katie Margavio Striley is an Assistant Professor of Interpersonal Communication in the Department of Communication Studies. Her primary research interests include exclusive and inclusive communication and the construction of systems of exclusion. Specifically, she explores the creation, maintenance, and termination of exclusive communication patterns, such as stigma, ostracism, bullying, and other forms of social rejection, as well as inclusive communication like dialogue, deliberation, and other forms of egalitarian communication. Her most recent project explored intellectually gifted adolescents' experiences of ostracism at school.</p> <p>Honors Carolina students register online when their registration appointment begins. Other students register online beginning November 17. Enrollment capacity increases on Nov 4 (1), Nov 6 (2), Nov 10 (3), and Nov 12 (4).</p>

Prerequisites: *First-year students only. Registration Procedures: *Students who are not enrolled in a fall 2014 FYS register online when their registration appointment begins. *Other students register online beginning Nov 17. ABOUT THE SEMINAR: Despite being elusive for many people, happiness remains a fundamental goal in most societies. In recent years, social scientists have become increasingly interested in the subject of happiness and its causes and consequences. This course will examine the interplay between individual and social happiness by exploring the nature and meaning of happiness in the contemporary United States as well as in other countries. We will seek to answer questions such as: What is happiness? Can we measure happiness, and if so, how? Does money buy happiness? Does happiness vary among diverse groups (racial, ethnic, religious, gender, age, social class)? How does happiness differ among cultures and nations? What is (and should be) the role of happiness in formulating public policies? We will address these and other questions by: reading books and articles; class discussions and debates; viewing films; and collecting information using the internet and other sources. ABOUT THE INSTRUCTOR: Arne Kalleberg is a Kenan Distinguished Professor of Sociology who studies topics related to work, occupations, organizations and social inequality. He received his BA from Brooklyn College and his MS and PhD from the University of Wisconsin at Madison. He has been on the faculty at

Student Instructors: Omololu Babatunde & Tasia Harris Course Description: The idea that we live in a `post-racial` society has sedated the masses, limiting critical thought or analysis to be formed around what it means to be Black in this day and age. South African social activist Steve Biko proclaimed that, `Being Black is not a matter of pigmentation, being Black is a reflection of a mental attitude.` In `The Politics and Socialization of Black Identity` we as a class will be working to interrogate Biko's, as well as other scholars' and activists' (like Du Bois, Fanon, hooks and Lorde), sentiments by asking ourselves what it means to be Black in the 21st century. We will challenge ourselves to think beyond `post-racial` pretenses to ask ourselves both collectively and individually `who we are?` `Why we are?` and `So what?` The learning experience of this course will not be limited to the confines of the classroom. Rather, it will be cemented in participants' lived experiences both in assignments (which will take the form of a collective class blog) and through engaging with different performing acts that present the type of cultural complexities we will address. THIS COURSE IS TENTATIVE, PENDING C-START COMMITTEE APPROVAL, AND DOES NOT COUNT AS ONE OF THE TWO HONORS COURSES REQUIRED ANNUALLY FOR MEMBERS OF HONORS CAROLINA. ALL STUDENTS ARE ELIGIBLE TO ENROLL FOR ONE (1) HOUR OF PASS/FAIL CREDIT.

Student Instructor: Marissa Bane Course Description: Through this course, students will address the pertinent problems and potential solutions relating to health care in sub-Saharan Africa today. As a class, students will also consider the effects of sub-Saharan Africa's health care structure. Finally, students will use the knowledge gained from the course to assess their role in improving the overall health care in sub-Saharan Africa. Topics covered will include primary and secondary health care, types of diseases, human resources, prevention efforts, and foreign aid. THIS COURSE IS TENTATIVE, PENDING C-START COMMITTEE APPROVAL, AND DOES NOT COUNT AS ONE OF THE TWO HONORS COURSES REQUIRED ANNUALLY FOR MEMBERS OF HONORS CAROLINA. ALL STUDENTS ARE ELIGIBLE TO ENROLL FOR ONE (1) HOUR OF PASS/FAIL CREDIT.

Student Instructors: Raymond Blackwell & Fedor Kossakovski Course Description: What is consciousness and how does it arise? What distinguishes Man from

Machine? These questions used to be restricted to scientists and philosophers but, with the rapid advent of technology, the average person finds themselves pondering them as well. Using Douglas Hofstadter's Pulitzer Prize-winning Gödel, Escher, Bach: an Eternal Golden Braid (affectionately, GEB) as our primary source, we will explore the notions of self-reference, tangled hierarchies, and consciousness. Along the way, we will tackle these tricky problems in an interdisciplinary fashion and draw connections between the course material and our own personal experiences to discover why, 35 years after its publication, GEB is still relevant. No prerequisites, except an inquisitive mind and a willingness to read. THIS COURSE IS TENTATIVE, PENDING C-START COMMITTEE APPROVAL, AND DOES NOT COUNT AS ONE OF THE TWO HONORS COURSES REQUIRED ANNUALLY FOR MEMBERS OF HONORS CAROLINA. ALL STUDENTS ARE ELIGIBLE TO ENROLL FOR ONE (1) HOUR OF PASS/FAIL CREDIT.

Student Instructor: Izaak Earnhardt Course Description: In this course, we will use the writing of prison and ex-prisoners as a medium to explore the history of U.S. prison systems from the nineteenth-century to present. In particular, we will examine how these works illuminate some of the ways in which history of the US prison system is tied to broader regimes of unfree labor, from nineteenth-century slavery to present-day for-profit correctional institutions. We will also consider writing as a as a political and subjectivity-producing practice. While the course will primarily focus on tropes and themes from American narratives of incarceration, we will also work to situate these narratives in global and historical discourses around exile, bondage, and incarceration. Authors read will include François Villon, Petrarch, Frederick Douglass, Herman Melville, Eugene Debs, Robert Burns, Chester Himes, Malcolm X, Jack Henry Abbott, Jimmy Santiago Baca, and Reinaldo Arenas. THIS COURSE IS TENTATIVE, PENDING C-START COMMITTEE APPROVAL, AND DOES NOT COUNT AS ONE OF THE TWO HONORS COURSES REQUIRED ANNUALLY FOR MEMBERS OF HONORS CAROLINA. ALL STUDENTS ARE ELIGIBLE TO ENROLL FOR ONE (1) HOUR OF PASS/FAIL CREDIT.

Student Instructor: Dana Landress Course Description: What is contemporary capitalism? Among scholars, historians, anthropologists, and economists there is much disagreement regarding capitalism as a system, a framework, a source of identity, an economic system, and a form of political ideology. Indeed, scholars still explore its development and the various ways in which capitalism determines the geographic, political, social, and economic zeitgeist of modern times. From the great European witch-hunt, to the modern United States prison system, to the markets in Cairo following the Arab Uprising, we will examine three guiding characterizations of capitalism: capital, philosophy, and history, configurations of individual and collective identities as informed by a capitalist system, and a critical exploration of capitalism's discontents, resistances, and regenerations in the twenty-first century. THIS COURSE IS TENTATIVE, PENDING C-START COMMITTEE APPROVAL, AND DOES NOT COUNT AS ONE OF THE TWO HONORS COURSES REQUIRED ANNUALLY FOR MEMBERS OF HONORS CAROLINA. ALL STUDENTS ARE ELIGIBLE TO ENROLL FOR ONE (1) HOUR OF PASS/FAIL CREDIT.

Student Instructor: Peter Vogel Course Description: Twenty years ago this April, the small Central African country of Rwanda was torn apart by a vicious genocide that killed over 800,000 people in less than 100 days. In the two decades that followed, Rwanda appears to have transformed into an oasis of stability and progress. In Nothing New Under the Sun? Change and Continuity in Rwanda Since 1994, we will place these two remarkable developments into a

broader historical context, seeking to critically examine and evaluate social and political developments in the nation. Key topics include the non-ethnic dimensions of Rwanda's genocide, the difficulties in transitioning to a democracy after mass violence and the nature of Rwanda's involvement in the Democratic Republic of the Congo. No prior knowledge of Rwanda is required but students should be prepared to wrestle with potentially traumatic subjects with the emotional sensitivity and academic maturity that they demand. THIS COURSE IS TENTATIVE, PENDING C-START COMMITTEE APPROVAL, AND DOES NOT COUNT AS ONE OF THE TWO HONORS COURSES REQUIRED ANNUALLY FOR MEMBERS OF HONORS CAROLINA. ALL STUDENTS ARE ELIGIBLE TO ENROLL FOR ONE (1) HOUR OF PASS/FAIL CREDIT.

Student Instructor: James Williams Course Description: Some say Africa is China's second continent, as China has invested billions of dollars in Africa's development and become the continent's largest trading partner. Moreover, estimates suggest that over one million Chinese people have migrated to Africa within the last ten years. This phenomenon has sparked both praise and criticism; some believe China is the catalyst for a new era of economic growth in Africa while others call China neo-colonialists in the region. This course will begin with a historical overview of Chinese engagement in Africa from the 1960s until the present. We shall then examine Chinese, African and Western perspectives on recent developments in Sino-Africa relations, utilizing a series of case studies to compare and contrast the often divergent narratives framed by government officials, academics, and the media in each of these respective regions. Our goal is to arrive at a more nuanced understanding of the motivations and outcomes of Chinese engagement in Africa by fully considering these narratives. THIS COURSE IS TENTATIVE, PENDING C-START COMMITTEE APPROVAL, AND DOES NOT COUNT AS ONE OF THE TWO HONORS COURSES REQUIRED ANNUALLY FOR MEMBERS OF HONORS CAROLINA. ALL STUDENTS ARE ELIGIBLE TO ENROLL FOR ONE (1) HOUR OF PASS/FAIL CREDIT.

Prerequisites: *First-year students only. Registration Procedures: *Students who are not enrolled in a fall 2014 FYS register online when their registration appointment begins. *Other students register online beginning Nov 17. ABOUT THE SEMINAR: The ups and downs of many stocks, bonds, and mutual funds in the past few years have made a significant impact on our society. Accordingly, a good understanding of financial markets becomes a necessary part of our education. This seminar is intended to provide students with a multimedia platform on which they can learn some basic concepts in finance and economics, useful tools for collecting and summarizing financial data, and simple probability models for quantification of the market uncertainty. Students will actively participate in the seminar's organization. A number of small projects will be assigned to students, supervised by the instructor. The projects include data analysis using Excel, experimentation of simple investment strategies and portfolios through virtual trading, discussions on the performance of those portfolios and related probability calculation. Students will present what they conduct in the assigned projects. Grades will be based on students' performance in their homework, projects, and presentations. ABOUT THE INSTRUCTOR: Chuanshu Ji joined the Department of Statistics and Operations Research after getting his Ph.D. in 1988 from Columbia University. Ji's research involves using statistics to quantify uncertainty and randomness in various problems

Prerequisites: *First-year students only. Registration Procedures: *Students who are not enrolled in a fall 2014 FYS register online when their registration appointment begins. *Other students register online beginning Nov 17. ABOUT THE SEMINAR: In the early 1900's the great writer H.G.Wells said 'Statistical thinking will one day be as necessary for efficient citizenship as the ability to read and write.' We see this every day as society becomes more and more complex and we are faced with a barrage of data and the pressure of making optimal decision about our life and our future in the light of this uncertainty. Yet we are ill-equipped both from an evolutionary perspective to make such decisions. The aim of this class is to study the role of uncertainty in our daily lives, to explore the cognitive biases that impair us and to understand how one uses quantitative models to make decision under uncertainty in a variety of fields and the connections of such questions to an array of scientific disciplines including psychology, financial modeling, evolution, sociology, law, economics, medicine and rare events and coincidences. ABOUT THE INSTRUCTOR: After spending most of his childhood in India, Sreekalyani Bhamidi came to the US to pursue a PhD in Statistics at the University of California at Berkeley. After 5 fantastic years pursuing his passion in probabilistic modeling of real world networks and eating wonderful food (!), he completed my PhD in 2008 and moved to Vancouver for a year to further

This course focuses on literary expressions by native, Latina, African, African American, and Asian American women reflecting intersections of gender, sexuality, ethnicity, class, and culture in the United States. With contextual readings in feminist thought across race and culture, theories of difference, theories of globalization and globalism, and postcolonial and decolonization theories; this course examines how each female subject imagines and negotiates

her personhood. How, for example, does each women embrace, amend, scrutinize, and/ or relinquish her role as daughter, sister, mother, wife, partner, and citizen? How does the intersection of race, culture, and class impact each woman's sense of self as citizen, as woman, and as human? Course participants will create performances (live, mediated, art-object) as well as research papers as critical tools in analyzing course materials. ¿Performance¿ will serve as a process¿oriented, participatory, and experiential way of critically engaging our theme. PREREQUISITE: COMM 160. CROSSLISTED WITH COMM 561H.

Professor Alexander Craft¿s research analyses dialectical constructions of ¿blackness¿ and performances of black cultural nationalisms in the Americas. She is interested in the ways in which twentieth and twenty-first century African-descended communities use literary and performance practices to argue for rights of citizenship and map differential terrains of ¿blackness.¿ More specifically, her research and teaching examine the relationship among colorism, Honors Carolina students register online when their registration appointment begins. Other students register online beginning November 17. Enrollment capacity increases on Nov 4 (1), Nov 6 (2), Nov 10 (3), and Nov 12 (4).

Detailed course description: This course will introduce students to primary theory and scholarship in Performance Studies. While it is not intended to introduce students to the field of Performance Studies, it will equip them to understand the genealogy of key scholarly practice, to locate contemporary work in relation to contested frames, and to engage in ongoing debates. In this course, we will engage with a selected body of readings that do not so much define the field of performance studies as describe the grounds of contemporary performance thought and practice. It will approach readings in units of debate, including "Queer Feliciities," "Homo Performans," "Is it Live?," "(De)Colonizing Performance," and "Performance Praxis." The course is intended for all students invested in primary study of performance and performativity.

Prerequisites: *First-year students only. Registration Procedures: *Students who are not enrolled in a fall 2014 FYS register online when their registration appointment begins. *Other students register online beginning Nov 17. ABOUT THE SEMINAR: Who is your most influential social acquaintance? Which airports are most crucial to air travel? Which genes are most likely to be successful drug targets? And finally, what do these questions have in common? They all aim at finding important {nodes} in a network of interactions. Networks are remarkably frequent in nature, making their study an interdisciplinary pursuit. Interestingly, generic network properties, even those as simple as the number of connections a node has, can yield surprisingly powerful insights into the system of interest. We will survey research fields relying on network theory and explore introductory mathematics. Besides participating in discussions based on popular networks literature, students will be required to develop a research proposal on a networks topic of their choice. ABOUT THE INSTRUCTOR: Dane Taylor is currently a postdoctoral researcher with joint positions at the Statistical and Applied Mathematical Sciences Institute (SAMSI) and the Department of Mathematics at the University of North Carolina. Prior to coming to North Carolina, he obtained MS and PhD degrees in Applied Mathematics from the University of Colorado through funding from the ARCS Foundation and Lockheed Martin. His undergraduate education led to BS

Prerequisites: *First-year students only. Registration Procedures: *Students who are not enrolled in a fall 2014 FYS register online when their registration appointment begins. *Other students register online beginning Nov 17. ABOUT THE SEMINAR: This course is a science seminar designed for students interested in exploring affective science or the science of human emotion, with special emphasis on research methods and scientific philosophy. Emotions are complex, emergent phenomena that involve our bodies, minds, and environments. Because emotion is entangled with both {mental} and {physical} processes, it impacts virtually every sphere of our lives. This course examines emotions as they relate to social behavior, health, self-regulation, development, physiology, neuroscience, culture, and embodiment. More broadly, this class will scaffold students' ability to read empirical literature and understand the many research methods used in affective science. ABOUT THE INSTRUCTOR: Jennifer MacCormack is a Social Psychology PhD student and member of the Carolina Affective Science Laboratory at UNC. She researches how bodily states, emotion beliefs, and complex emotion knowledge each contribute to the experience of emotion. To investigate this, she uses social cognitive methods, psychophysiology, neuroimaging, and developmental science. Jennifer has received a Junior Scientist Fellowship from the American Psychological Association and has also served as a graduate research consultant and teaching

Prerequisites: *First-year students only. Registration Procedures: *Students who are not enrolled in a fall 2014 FYS register online when their registration appointment begins. *Other students register online beginning Nov 17. ABOUT THE SEMINAR: Movements ranging from uprisings in Tunisia, Egypt and beyond to ¿Occupy¿ protests in the United States have been using new media technologies to coordinate, organize, and intervene in the public sphere as well as to document, share, and shape their own stories. Using a range of tools from Facebook to Twitter, from satellite modems to landlines to ad-hoc mesh networks, these movements have made their mark in history. The objective of this seminar is to enhance our conceptual and empirical understanding of the interaction between the new media ecology and social change. We will explore various approaches to studying social movements and social change and look at specific cases. Governments and powerful institutions are also responding to the challenge posed by the emergence of the Internet as a mundane and global technology. From increased surveillance and filtering capacity, to delivering propaganda over the Internet to their own, governments around the world are broadening their repertoire of social, technical, and legal tools for control and suppression of¿and through¿the Internet. We will explore the integration of new media tools within these movements as well governmental and institutional responses to these developments. Materials for this class will include

Prerequisites: *First-year students only. Registration Procedures: *Students who are not enrolled in a fall 2014 FYS register online when their registration appointment begins. *Other students register online beginning Nov 17. ABOUT THE SEMINAR: A smart city is one where the needs of a populace meet the needs of environmental sustainability. The balance between the social and environmental issues is governed by Information and Communication Technologies (ICT) that power a smart city infrastructure. In this course, we learn about the influence of urban networks, smart city urban planning, energy as a catalyst of sustainable development, smart city infrastructure, sustainable transportation, flow of information and communications, smart grids, digital infrastructure and the role of data and information technology. We will discuss criteria for measuring the smartness of a city, including quality of life, citizen governance, and discuss issues that go towards the making of a future smart city. Several case studies will be presented with guest lecturers invited to present on critical thinking and practices in smart city development. ABOUT THE INSTRUCTOR: Arcot Rajasekar is a Professor in the School of Library and Information Sciences, a Chief Scientist at the Renaissance Computing Institute (RENCI) and co-Director of Data Intensive Cyber Environments (DICE) Center at the University of North Carolina at Chapel Hill. A leading proponent of policy-oriented large-scale data management, Rajasekar has several

Prerequisites: *First-year students only. Registration Procedures: *Students who are not enrolled in a fall 2014 FYS register online when their registration appointment begins. *Other students register online beginning Nov 17. ABOUT THE SEMINAR: What does it mean to be an educated person? What function do schools serve? This seminar builds on the experiences of schooling that students bring to the university. It invites them to re-consider and de-construct what they know about education and schools as a result of those experiences. The seminar considers traditional schooling along with non-traditional and international approaches to educating youngsters. Included are provocative readings, discussions and invitations to brainstorm schooling as it relates to education. Students will be challenged to re-consider their experiences and notions about school and to examine alternatives. Students' first-hand knowledge and experiences combined with a critical perspective will encourage innovative thinking about ways and places of learning with the aim of generating proposals for new or reformed schools and new forms of public education for the future. ABOUT THE INSTRUCTOR: Suzanne Allen Gulledge is a Clinical Professor of Teacher Education, Curriculum and Instruction, and International and Experiential Education. She was named a UNC-Chapel Hill University Engaged Scholar in 2009. International and global studies and community based service learning are among her teaching and research interests.

A course on the quantitative aspects of basic human physiology. Class work will provide students with a basic understanding of human anatomy and physiology.

A laboratory portion will explore actual physiological measurement techniques and quantitatively evaluate human physiology using statistical analyses. Students should be registering for 4 credits!

Bldg: Knapp Bldg		Room: 3301	Days: MW	Time: 16:40 - 17:55	Applied Envrionmenta			
Rank: INST						Load: 50	Instructor: HUGHES,JEFFREY A	
Rank: INST						Load: 50	Instructor: BARNES,GLENN A	
Class Enrl Cap: 5		Class Enrl Tot: 4		Class Wait Cap: 0	Class Wait Tot: 0	Class Min Enrl: 0	Foot note:	
Special Grading: GR3								

Course defaults to 1.0 hours credit. Be sure to select the credit tab and adjust to 2.0 hours. If you need help, contact jack_whaley@unc.edu to be put into the class

ENVR	890	007	4857	SPECIAL TOPICS/ESE	Lecture (Face to Face Instruction)	1 - 21	A
Bldg: McGavran-Greenberg		Room: 2304		Days: TuTh	Time: 15:30 - 16:45	Water, San, Hyg & Gl	
						Rank: INST	Load: 100.0
						Rank: INST	Load: 100.0
						Instructor: BARTRAM,JAMES K	
						Instructor: SOBSEY,MARK D	
Class Enrl Cap: 20		Class Enrl Tot: 8		Class Wait Cap: 0		Class Wait Tot: 0	
						Class Min Enrl: 0	
						Foot note:	
						Special Grading: GR3	

Enrollment is limited to graduate students and upper level undergraduates who have core knowledge in chemistry, biology, epidemiology and statistics. This core knowledge would be satisfied by undergraduate or entry level graduate courses in chemistry though organic chemistry, biochemistry, microbiology or cell biology and epidemiology. Core knowledge in risk assessment is also recommended. Undergrads should request faculty approval for admission to class.

Analytic skills seminar on the theory and practice of program impact evaluation. Topics: key issues to consider when evaluating program impact; selectivity and other problems; research designs; estimation strategies including instrumental variables, difference-in-differences, fixed and random effects models, regression discontinuity methods, matching methods, and selection models. Prerequisites: Knowledge of Stata or a similar statistical package is required. It is assumed that students are familiar with descriptive and inferential statistics as well as multiple regression analysis. Instructor permission required for non-second year MCH doctoral students.

This course is intended for undergraduate and graduate students in the health professions and social work who know no Spanish or who know so little that they feel the need to start from scratch. Students with more than two semesters of college Spanish are not permitted to take this course. The course covers the curriculum of first-semester Spanish taught within a health context. Activities center on an original film set in North Carolina and Mexico.

This graduate-level course is also open to senior level undergrads. The course is available for (1), 2 or 3 credits and is held off-site at the NC Biotechnology Center. The course includes students from Duke, UNC and NCSU from diverse disciplines. Please note: Students taking the course for 3 credits

are required to attend a 1 hour discussion session on Thursday mornings (8:30 & 9:30 am) on UNC campus. Under special circumstances and with permission, students may take the class for 1 credit.

This is a 3-credit course designed to provide students with the fundamental research and analytic methods needed by public health leaders to assess the effectiveness, efficiency and equity of healthcare in order to improve population health. The focus will be on research skills needed by practitioners with the objective of improving health outcomes.
